

CHATBOT DESIGN SPRINT

Develop a chatbot concept in a half-day session with our paper-based Chatbot Design Sprint.

MAYBE you already have an idea for your chatbot, then use the sprint to make it real with your team.

Maybe you want inspiration and knowledge, then use the sprint for hands-on learning of AI, chatbot functionalities and personalities.

A Chatbot Design Sprint is a way to develop chatbots as a team. No technology background necessary. With our tools your team gets smarter on AI and uses that to explore the chatbot possibilities.

The outcome is a chatbot defined through a simple user story with chatbot functionality and personality that match your brand and voice. Your team ends up with a ready-to-go chatbot concept.

Contact us and let's arrange a Chatbot Design Sprint with your team.
