

Taking control of your cloud

Public cloud opens the door to a more agile, scalable and cost-effective IT estate. There are many reasons to adopt a cloud-based strategy, but only if a programme of ongoing optimisation is in place. **KCOM's Cloud Optimisation Services** put you back in control.

Cloud Optimisation from KCOM analyses all aspects of cloud usage. The modular offering identifies opportunities for improvement and then provides various means by which to address them. Information is customised to the unique business needs and objectives of each organisation.

KCOM's Cloud Optimisation Services provide organisations with analysis of their cloud infrastructure, complete with reports and recommendations. Performed regularly, this enables organisations to prioritise, plan and action optimisation activity on an ongoing basis.

The services could be used in conjunction with your public, hybrid or multi-cloud environment, including AWS, Azure and Google cloud. For organisations still in the datacentre and looking to move to the cloud, Cloud Optimisation can be used to analyse candidates for cloud migration. Examining downstream application and infrastructure dependencies, and modelling the migration, makes it possible to calculate likely costs.

Benefits of Cloud Optimisation:

- > Gain insight into your cloud usage and spend
- > Increase resource utilisation and density
- > Automate tasks to simplify cloud management
- > Improve governance and control by driving accountability
- > Reduce risk and stay ahead of vulnerabilities
- > Align cloud spend to business needs

Gold

Microsoft Partner

KCOM Cloud Optimisation Services:

View

Gain visibility into your cloud usage and cost through the CloudHealth Cloud Management Platform, identifying cost savings and areas for optimisation.

Insight

Regular highly-focused optimisation reports and recommendations. The service provides consultation and guidance to help you optimise your IT estate.

Action

Provides advice and best practice policies to help implement continuous cloud optimisation. Establish effective control policies, governance, monitoring and usage alerts.

Your trusted Cloud Optimisation partner

We work with you to understand your IT needs, along with your broader business objectives. The result? Customised solutions that enable you to fully realise the potential of your cloud, today and in the future. Our experience and proven methodologies ensure that you can manage your cloud optimisation implementation in the most efficient and least disruptive way.

We have expertise in both tooling and management, and are perfectly placed to help you make your cloud the best it can be.

We simplify your IT by doing the heavy lifting, so that you can free your teams up to focus on innovation and delivering business value. Our goal is to help you achieve the full potential of your cloud environment.

Cloud Optimisation free trial

The road to cloud optimisation begins with a snapshot of your current environment. We offer you a 14-day free trial, powered by CloudHealth, to help you gain visibility and control of your cloud usage and cost. To register for the 14-day trial visit www.kcom.com/cloud-optimisation-trial.

Re-imagine how.

By combining ingenuity, agility and integrity, KCOM goes beyond the mandate: shaping solutions to meet the demands of emerging and future business challenges.

KCOM believes that the greatest opportunities lie in the unknown. That there is always an alternative, smarter way to achieve business goals.

To re-imagine how.
