

# Infrastructure Platform Assessment

Control costs, enhance performance and minimise risk.

Contact your Account Manager or email [brilliance@6dg.co.uk](mailto:brilliance@6dg.co.uk)

Our Infrastructure Platform Assessment delivers a **quantitative and qualitative analysis** of your server infrastructure. Having mapped your systems and interdependencies, we work with you to analyse this output to identify areas where you can **control costs** and **enhance performance of mission-critical applications**. We'll also flag security risks in your servers and software to **minimise your exposure to breaches**.

## Your Infrastructure Platform Assessment Journey

## Infrastructure Platform Assessment Phases

- 

**1 Kick-off and agreement of your organisation's priorities.** To ensure our assessment delivers the right outcomes for your organisation, we first need to understand your key drivers - cost optimisation, application performance, security, or all three.
- 

**2 Prerequisite completion and tool deployment.** By deploying monitoring tools to collect inventory and activity data we gain a more detailed understanding of your technology estate, and establish key areas to investigate.
- 

**3 Data collection and monitoring.** Having deployed our assessment tools we leave them to run for a period of time (usually 30 days) to capture inventory and activity data across your organisation.
- 

**4 Data analysis and consultative workshop.** We analyse the output from the monitoring tool and review this with you to identify opportunities to right-size and optimise your estate.
- 

**5 Result review and proposal presentation.** Finally, we produce a full report detailing recommended remediation activity and suggested priorities as they relate to your organisation's key objectives.

## Infrastructure Platform Assessment Outputs

- ✓ A view across your physical and virtual Windows and Linux servers
- ✓ Raw data collection for up to 30 days to capture month-end-activity
- ✓ Multi-cloud cost analysis, pricing options and recommendations
- ✓ Consultative workshop mapping inventory data to operational and business logic, enabling Six Degrees to build a meaningful proposal.

Activity	Size	Cost	Days
Kick-off strategy workshop	Any	Free	Half-day
Cloud Assessment	Up to 100 servers	£8,500	30 days tool-based assessment + up to 2 days consultancy
	101 - 250 servers	£11,500	30 days tool-based assessment + up to 3 days consultancy
	251 - 500 servers	£14,500	30 days tool-based assessment + up to 4 days consultancy
	501 - 1,000 servers	£19,500	30 days tool-based assessment + up to 6 days consultancy
	1,000 + servers	POA	Dependant on scale and scope
