

## Azure Arc 3-Day POC

**FyrSoft experts are offering a 3-day Azure Arc POC to help customers unified cloud VM's into a single management platform, regardless of their cloud platform.**

For customers who want to simplify complex and distributed environments across on-premises, edge and multi-cloud, Azure Arc enables management virtual machines outside of Azure hosted VM's anywhere and extends Azure management to any virtual machines in any infrastructure.

**Organize and govern across environments** - Get databases, Kubernetes clusters, and servers across on-premises, edge and multi-cloud environments under control by centrally organizing and governing from a single management portal.

**Run data services anywhere** - Get automated patching, upgrades, security and scale on-demand across on-premises, edge and multi-cloud environments for your data estate.

**Multi Cloud Management** - Google Cloud, Amazon Web Services(AWS) and Azure.

**Azure Arc:** Bring Azure services and management to any infrastructure

**Run Azure data services anywhere**

**Extend Azure management across your environments**

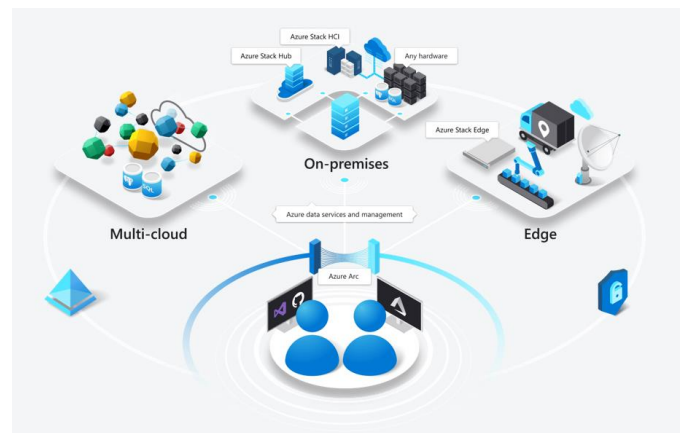

**Adopt cloud practices on-premises**

**Implement Azure security anywhere**

### Why Azure Arc for Multi-platform Management

Azure Arc is a set of technologies that extends Azure management and enables Azure services to run across on-premises, multi-cloud, and edge.
