# BCX Information Security – Vulnerability Assessment and Network Penetration Testing

Vulnerability assessment is a process of defining, identifying and classifying the security holes in information technology systems. An attacker can exploit a vulnerability to violate the security of a system.

## CHALLENGES

The proliferation of Denial of Service attacks, and malware software, such as worms, viruses, Trojan's, spyware, and keystroke loggers, means your networks, business systems, processes, and also endpoints, are more vulnerable to attacks, so the need for up-to-date security compliance is greater than ever before.

## IDEAL SOLUTION

By performing a Vulnerability assessments and Network Penetration tests, the organization can pro-actively identify weaknesses in IT systems and subsequently make informed decisions to mitigate the risks associated with Information Technology systems and Data Security. Leveraging Microsoft Technologies such as M365 and Azure Sentinel, to help you remediate findings quickly.

## DESIRED OUTCOMES

At BCX, skilled and experienced consultants provide insight and guidance to help you analyze, build and manage security products, systems and services, that are customized for the requirements of your industry.

## Business Connexion Namibia Pty (Ltd)

### BCX X-Pen-Testing

The main aim of the Security BASELINE assessment is to ease the process of security status assessment using an intensive, focused approach that creates high impact, risk based solutions within a short timeframe.

#### Let us do the planning

The Vulnerability Assessment and Network Penetration testing approach is derived from BCX's comprehensive Information Security Framework to ensure a fit for purpose use of the Microsoft Security advantage, such as the Intelligent Security Graph.

#### Perfect Security for the perfect customer

By analyzing and comparing the state of the organization's information security against the current landscape we can identify and expose security risks, measure their impact on the organization and suggest remediation where required.

#### With our solution and Microsoft Security

We will deliver a transition into a Secure, Productive Enterprise that will enable you to focus on your business and let us take care of the security journey.
