

Server 2008 End of Support

Now is this the ideal time to migrate to Azure.

End of support is coming for two of Microsoft's server products.

On 9th July 2019, support for SQL Server 2008 and 2008 R2 will end.

On 14th January, 2020, support for Windows Server 2008 and 2008 R2 will end.

This means the end of regular security updates.

Don't let your infrastructure and applications go unprotected. The cubesys team is here to help you migrate for greater security, performance and innovation.

Migrate to Azure, get free Extended Security Updates

End of support is an ideal time to transform your IT estate to the cloud. But who has the time to upgrade everything before the end of support timeline?

Fortunately, Microsoft has announced that *Extended Security Updates* will be available for *free* in Azure for 2008 and 2008 R2 versions of SQL Server and Windows Server to help secure your workloads for three more years after the end of support deadline.

You can rehost these workloads to Azure with no application code change. This gives you more time to plan your future path.

Time is running out, don't get caught out, contact cubesys today.
