

Inviso's Cloud Adoption Framework (CAF) Engagement will help you build a robust foundation for cloud adoption in Azure

Migrating to the cloud is a vast undertaking and sometimes it is hard to know where to start. It doesn't matter if you have some deployments or none at all – if you're planning to scale-up in Azure you need the correct structure in place to build a truly scalable and secure infrastructure. Utilizing Inviso's CAF Engagement offering will give you a solid foundation for your cloud journey.

Our team of experts will create a tailored offering, ensuring the correct framework is in place to scale in the right direction.

- **Cloud Adoption Framework:** CAF is Microsoft's best practices approach to cloud adoption in Azure, drawing on the experiences of its employees, partner, and customers. We will help you leverage CAF to define your specific business and technical strategies for cloud adoption.
- **Governance Workshop:** We perform a collaborative workshop with you to provide insights on how to create a reliable, auditable, and flexible governance framework to ensure the successful use of Azure adoption.
- **Landing Zone:** Quickly deploy best-practice infrastructure to support your workloads in Azure.
