

POWERAPPS AND MS FLOW ESSENTIALS TRAINING

THE COURSE

Canvas Apps and Microsoft Flow Automations at this One-Day Training Event.

Our Essentials course goes beyond what is covered in the basic 100 level sessions. All of the content in this course has been created by our team. This course will prepare you to build PowerApps and MS Flow solutions for personal productivity or to tackle task / department level solutions.

OVERVIEW

Microsoft Flow concepts such as:

- Connecting to data sources like SharePoint and Azure SQL
- Capturing media and images in your PowerApps
- Building Apps for your business in both tablet and mobile form factors
- How to automate workflows and processes in your organization using MS Flow.
