

Microsoft Azure AppDev Hackfest

Expand your knowledge and hands-on AppDev experience in the cloud with a training and Hackfest!

Tallan's Vice President of Cloud Technologies, Dan Fluet, will host this two-day, instructor-led event in an immersive, hands-on, lab environment paired with presentations.

Schedule

Day one, will focus on Azure AppDev education in a classroom setting.

Day two, attendees will participate in a hackathon where you'll design and build a solution using the Azure knowledge you gained on day one.

Challenge Options

IaaS Challenge

Build a compliant architecture in order to gain experience provisioning VMs and creating virtual networks and subnets.

Data Challenge

Build a solution using Data Service on Azure.

Cognitive Services Challenge

Build a solution on Cognitive Services using Azure.

PaaS Challenge

Build a PaaS solution on Azure.

Experience Talent-Driven Innovation

Founded in 1985, Tallan provides technology and business process consulting services to enterprise and mid-sized companies, as well as government entities, with a focus on Custom Development, Portals and Collaboration, Business Intelligence, Application Integration, Mobile Platforms, User Experience, Ecommerce, Web Development, and Cloud Services.
