

DATA & ADVANCED ANALYTICS ENGAGEMENT OFFERS

Taking a business-first approach, Neudesic offers on-site evaluations and provides extensive, actionable recommendations to help you get started with the strategy and implementation of your enterprise data & analytics solutions.

Strategize

Data & Analytics Innovation Session

Discover the art of the possible in this interactive whiteboard session where our leading data & analytics experts share top tech trends disrupting your enterprise.

Data & Analytics Strategy Assessment

This assessment is designed to help you understand how analytics solutions can be modernized and optimized for innovation, performance and growth.

Included in this innovation session:

- Cloud platform assessment
- Business process to data source mapping
- Current state assessment
- Written recommendations for your future state

Implement

Advanced Analytics Jump-Start POC

The tactical implementation of advanced analytics is a hurdle for enterprises that often lack the deep technical knowledge required for implementing advanced analytics solutions.

In this session, Neudesic:

- Assesses the feasibility of machine learning and advanced analytics solutions
- Works with you to gather necessary information and data
- Provides insights delivered through machine learning and a formal presentation and roadmap

Cloud Platform Solution Assessment

In this session Neudesic provides a comprehensive assessment of your current state of data & analytics, resulting in a written recommendation with deployment architectures, and initial selection of cloud services.
