Windows Virtual Desktop PoC

Tailored Windows Virtual Desktop Proof of Concept

ABOUT

Experience **Windows Virtual Desktop** (WVD) within your organisation and see for yourself how Microsoft's new cloud based virtual desktop can help you deliver business change.

WE WILL...

848 will work with you to deploy a tailored WVD PoC to provide a remote desktop or published applications via a web browser or WVD client through developing an understanding of your business requirements, develop a strategy for secure remote working utilising Microsoft Azure and M365 technologies, and continually assess and monitor the user experience.

This will enable 848 to deliver a successful PoC to the benefit of your organisation and help you transition a modern desktop infrastructure.

Scope of the Windows Virtual Desktop PoC

PLAN

Includes:

- Overview of WVD
- Review of existing customer licensing
- Review of PoC users
- Review of application estate
- Review of existing core infrastructure
- Review of existing identity and security including Azure AD, AD, Azure Security Services, M365 Security and any 3rd party security products
- Review of existing client configuration
- Review of availability and disaster recovery requirements
- High level design and project plan of PoC implementation

BUILD

Includes:

- Deployment of WVD as per the high-level design in the existing customer Azure subscription
- Installation and publishing of up to 5 applications and Office 365 Pro Plus
- Configuration documentation

RUN

Includes:

- PoC user onboarding
- Support 08:30 – 18:00
- Monday to Friday during PoC
- PoC user survey
- PoC review
- Next steps

We have over a decade of experience in Planning, Building and Running intelligent Microsoft products and solutions that enhance and add value to organisational operations, delivering Business Changing IT.

THE 848 GROUP IS A LEADING MICROSOFT GOLD PARTNER WITH 12 GOLD COMPETENCIES...

We are considered in the highest tier of Microsoft Partners, achieving twelve Gold Competencies that illustrate our expertise, knowledge and strength in the provision of Microsoft Technologies.

WHAT IS WINDOWS VIRTUAL DESKTOP?

Windows Virtual Desktop is a desktop and app virtualization service that runs in the Azure cloud. Built upon existing Microsoft Azure technologies it enables secure access to resources and applications running on Windows 10, Windows Server and Windows 7 desktops with a unified management experience.

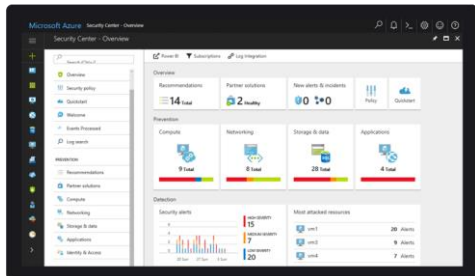

For organisations that still require Windows 7 for backwards compatibility with the application estate it provides Windows 7 virtual desktops with free extended security updates.

Why trust Windows Virtual Desktop?

Microsoft invests more than **USD1 billion annually** on cybersecurity research and development.

Microsoft employ more than **3,500 security experts** completely dedicated to your data security and privacy.

Microsoft Azure has **more compliance certifications** than any other cloud provider.

Benefits and capabilities of Windows Virtual Desktop:

The only multi-session Windows 10 experience

Free Windows 7 Extended Security Updates

Optimisations for Office

365 ProPlus

Microsoft Teams optimisation to enable support of audio and video optimization with the Windows Desktop Client

User profile containerisation with FSLogix profile containers hosted in Azure Files or traditional file storage

Scalability to manage both cost and performance

Access to a published desktop or applications

GLOBAL AEROSPACE

A global aerospace manufacturing company with headquarters in the UK with locations across Europe and Asia with over 2000 employees.

THE PROBLEM

During the pandemic they required a secure remote working solution for overseas employees and 3rd party support companies that had the ability to scale quickly and give access to both Azure-based and on-premise resources.

THE SOLUTION

As Azure was the existing cloud-based IaaS platform and user licensing was for M365 E5 licenses under an enterprise agreement, Windows Virtual Desktop was the ideal remote working solution. Utilising the existing Azure core infrastructure as the WVD landing zone 848 were able to quickly deploy a full desktop virtualization environment to support key workers.

THE RESULT

A secure and scalable platform utilising existing technologies and licensing that could be expanded quickly, but initially allowed key workers remote access within days to core applications and data, and then as users returned from furlough or had limited access to corporate facilities, enabled them to work remotely as the environment scaled.
