REFRESH YOUR APP / REVITALISE YOUR PEOPLE

We all know the benefits of the Cloud. It's getting there that can be the challenge.

A solid plan is crucial to successfully reduce operating costs, empower your staff and create unique business differentiators.

THE CHALLENGE

Poorly executed digital transformation or application modernization initiatives can have major negative impacts on your business productivity and staff satisfaction.

GET THE RIGHT ADVICE

Knowing were to start can be overwhelming. Partnering with Provoke empowers your team to leverage eighteen years of experience in delivering enterprise applications.

A BLUEPRINT FOR SUCCESS

A proven framework is key to implementing your cloud strategy. Your plan needs to include not only the right technologies but also training for your people and optimising your processes.

Azure Accelerate will help make your journey to the Cloud a success.

We will assess your current platform and business processes and provide expert guidance on how to get your applications and data ready for the Cloud.

PLATFORM READINESS

An in-depth audit of your existing application or platform. The goal is to optimize your Azure platform use, applications and operating costs. We provide detailed recommendations for improvements to your cloud strategy. Training and consulting on the Azure platform and services.

APPLICATION MODERNIZATION

Learn how you can extend your investment in your current applications by leveraging Azure services. Add value for your users through AI and support rapid change with better DevOps and architectural practices.

CLOUD MIGRATION

Create a detailed Azure-focused roadmap for your future business needs. The roadmap will cover platform setup, migration to the cloud and application optimization. It is a blueprint to execute your vision.

.

Azure Accelerate Approach

DEFINE STRATEGY

- Define business goals, success metrics and target pilot workload.

ASSESS & PLAN

- Assess your current state including solutions, people and processes.
- Plan for staff training and rolling out DevOps practices.

MIGRATION & GOVERNANCE ROADMAP

- Define security, access, networking, monitoring and cost management policies and configurations.
- Migration approach and roadmap

RE-VITILIZE

- Rearchitect applications to increase business benefits.
- Plan UX refresh and design to maximise staff engagement

Case Study: Trustpower

As one of New Zealand's leading electricity and telecommunications companies, Trustpower was committed to leveraging Azure to drive internal productivity and engagement with their customers. Provoke assisted their team in planning the migration to Azure and modernisation of several key applications.

SOLUTION GOVERNANCE

Provoke implemented framework that allowed for distributed management of key resources, enabling teams to manage their own applications while still ensuring consistency across the platform and monitoring solutions.

APPLICATION MODERNISATION

Provoke provided expert guidance on rearchitecting four legacy applications. The applications were migrated to the cloud, upgraded to modern supportable frameworks and leveraged Azure PaaS services to speed up development.

DEVOPS STRATEGY

Provoke developed a solid DevOps strategy through the automation of deployments, monitoring and environments. The Trustpower team can now confidently maintain and evolve these products over time.

Provoke loves Microsoft Azure!

Provoke has helped countless customers realise true business benefits by using our proven Azure Accelerate approach to get the most out of Microsoft Azure platform.

Microsoft Azure

SCALABLE AND SECURE

Regardless of your solution type, current user base and technology stack there are cost effective Azure services to support your workloads. And as your business grows the platform scales with you.

EASY WINS

There is a plethora of features and components that with the right expertise can add value to your solutions without massive cost overheads. From streamlining deployments to adding AI to solutions, Azure helps to delight both your staff and customers.

REDUCED OPERATING COSTS

Through smart architecture, implementation choices and automation not only can you minimise hosting costs but also drive down your development and maintenance overheads without compromising reliability.
