Change the way you see your data using Power Platform: 1-Hour Assessment

Data is the new oil. It has the potential to completely revolutionize your industry, if you know how to interpret it. Transform your decision-making mechanisms using suggestions made by our team of experts. We assess your data ingestion and visualization processes, highlighting areas that can improve your ability to act on data.

Agenda:

1. Evaluate your data ingestion/processing and visualization mechanisms
2. Identify quick-win opportunities via Power Platform
3. Check the feasibility of enhancements using Power Platform components (Power Apps, Power Automate, and Power BI) in association with sources like SharePoint, CDS, and SQL

Deliverables:

After the assessment, you will have the following:

1. Data strategy and design of possible implementation
2. Collaboration-based suggestions for MS Teams and/or Outlook
3. Licensing options, costs, and governance recommendations

About MAQ Software:

MAQ Software is a Microsoft-Preferred Supplier for Power BI. We were early adopters the Power Platform suite. Since its inception, we have developed applications and automated business processes using Power Apps, Power Automate, and Power BI.

We have:

- Delivered over 50 Power Apps
- Automated various business processes using Power Automate for Fortune 500 companies
- Engaged with enterprise-wide implementations using Power Portal
- Integrated Power Apps into Teams and SharePoint sites

Receive counselling support from one of our Microsoft FastTrack-recognized Solution Architects.

Note:

1. This assessment might require us to collaborate with business analysts, business leaders, and other stakeholders within your organization
2. This assessment will be conducted via Microsoft Teams or conference call, unless an in-person meeting is feasible
