

Modernise your apps and leverage the benefits of Azure Cloud with vNEXT

The vNEXT App Modernisation Plan

Legacy applications and infrastructure are the backbone of many organisations. However, these applications often struggle to keep pace with the agility of today's modern applications. The vNEXT App Modernisation Plan will help you innovate faster, improve reliability and realise the full benefits of the Microsoft Azure platform.

HOW DOES IT WORK

Build

We work with you to understand your business needs and the current constraints of your applications. We assess your applications and provide a plan to leverage the benefits of Cloud Native features such as resiliency, availability, and security.

Deploy

Automated build and deployment pipelines enable your teams to release applications with speed, consistency, and reliability. vNEXT will help you design and implement a world-class automation strategy to unlock all of the agility and benefits a modern cloud platform has to offer.

Monitor

Automated testing and monitoring help you to improve feedback and increase agility in every stage of the development lifecycle. vNEXT are experts in designing and utilizing monitoring tools and dashboards that can provide you a 360° view of your applications and the metrics driving your business.

Why vNEXT App Modernisation Plan?

We work with customers to reimagine what is possible with Microsoft Azure. We bring battle-tested strategies and methodologies along with proven tools and artefacts to deliver to market faster. Most importantly, we listen and seek to understand your specific challenges and concerns. Together, we will innovate and breathe new life to your applications and infrastructure.
