

Palo Alto Networks Ultimate Test Drive Microsoft Azure

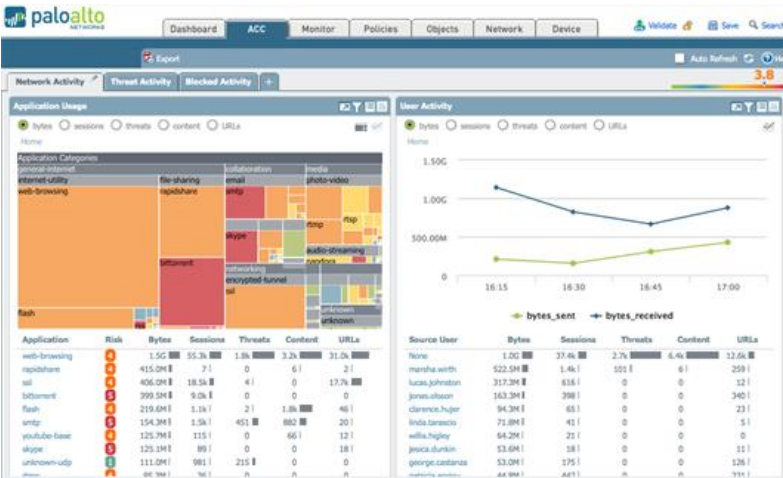

Palo Alto Networks – Ultimate Test Drive on Microsoft Azure

The Ultimate Test Drive program is designed to provide attendees with a guided hands-on experience of Palo Alto Networks highly automated and natively integrated Security Operating Platform. Each Ultimate Test Drive will introduce attendees to the innovative ways in which we can help to improve security posture and protect organization from advanced threats.

In individual test drives tailored to the Palo Alto Networks Security Operating Platform, see firsthand how easy it is to securely extend your corporate data center into Microsoft® Azure using Palo Alto Networks Next Generation VM-Series Firewalls with security features to protect your valuable applications and data from threats.

You will learn how to:

- Implement security policies to safely enable applications
- Implement security policies to enable applications in your Azure Resource Group
- Understand common customer use cases for VM-Series on Azure
- Protect your deployment by proactively blocking a brute-force attack

- Gold Cloud Platform
- Gold Cloud Productivity
- Gold Communications
