Is Your Business Ready for the Cloud?

Take the first step in preparing for a migration to Azure.

SATALYST®

The Satalyst Azure Readiness Assessment

A 2-3 week engagement that provides your organisation with high-level documentation of your readiness to modernise your environment in Azure. Your roadmap will include email and office tools through to line of business custom applications, identifying the business systems and detailing a prioritised list of workloads for modernisation and migration.

Why Azure?

- Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow

- Build on your terms

With a commitment to open source, and support for all languages and frameworks, build how you want, and deploy where you want to

- Operate hybrid seamlessly

On-premises, in the cloud, and at the edge – we'll meet you where you are. Integrate and manage your environments with services designed for hybrid cloud

- Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, government, and startups.

Develop a Cloud Roadmap

- Understand dependencies and potential migration groups
- Identify Legacy Applications impacted and approach for deploying in Azure
- Articulate your vision for Cloud to key stakeholders

Estimate Azure Costs

- Gather information on the state of your current environment
- Develop a high-level Azure architecture for your future state
- Estimate potential running costs for your future Azure environment

South Australian Tourism Takes Pioneering Trip to the Cloud

"Satalyst played a vital role with providing expert strategic advice and support prior, during and after our migration. Our experience with Azure was minimal prior to our migration and we found we were able to rely on Satalyst to deliver a full migration with reduced risks. Six months since our transition to Azure, we've maintained a secure, consolidated and cost-efficient environment that we can now build on."

SATALYST®

Creating Tangible Value For Your Cloud Strategy

Define Strategy
- Understand your motivations for cloud adoption
- Establish clear business outcomes with stakeholders
- Prioritise business outcomes

Assess Current State
- Catalogue workloads, applications, data sources, virtual machines and other IT assets.
- Understand how these workloads are used within your business and the level of expected impact if migrated

Develop Roadmap
- Identify workloads suited to IaaS, PaaS and SaaS and prioritise based on business impact and technical complexity
- Recommend target workload for initial Proof of Concept migration

Satalyst Azure Readiness Assessment

A fixed price engagement to streamline your cloud migration pathway.

$7,500 + GST[1]

- Typical engagement is fixed price, lasting 2-3 weeks

- Identifiable cost savings or between 30-70% for Satalyst customers

Contact us now to discuss how we can help you get started

+618 9355 2807

[1] based on typical environment. The actual cost and effort required will depend on the complexity of the environment and the number of workloads to be migrated.

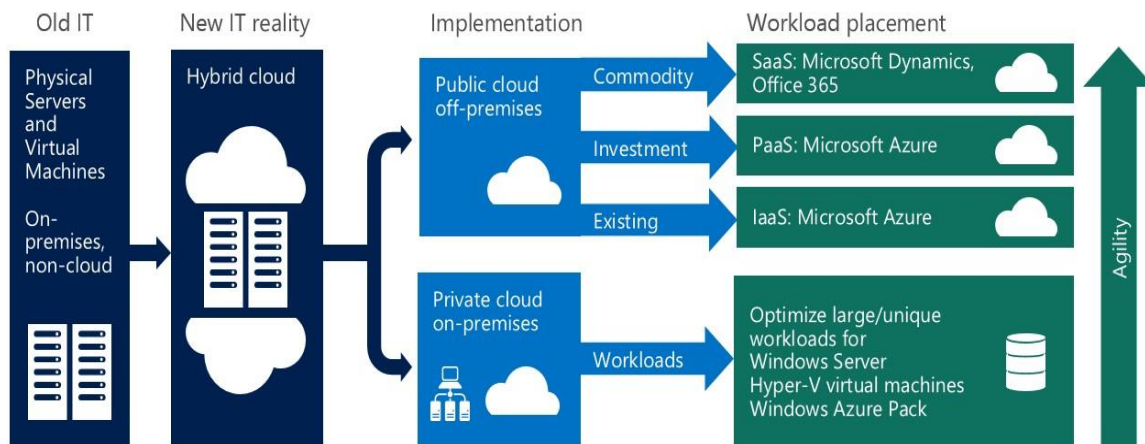

Figure 1 – Microsoft Hybrid Cloud Strategy

Before progressing with a cloud migration for your business, it is necessary to give careful considerations about which workloads are suited to Public or Private Cloud or can be retired altogether. The Satalyst Azure Readiness Assessment follows the Microsoft Cloud Adoption Framework and Hybrid Cloud Strategy to help you decide the optimal combination of IaaS, PaaS or SaaS depending on the level of agility required for each workload.

Why Satalyst for Azure Readiness Assessments?

Satalyst is Microsoft Gold Cloud Platform Partner with recognised expertise helping customers modernise their businesses in Azure. Satalyst focusses on delivering real solutions to business problems through the innovative use of technology. Satalyst has the latest knowledge and technical skill to advise on cloud strategy, define roadmaps and design optimal cloud architectures. Satalyst is renowned for working closely with our customers to design, build, deploy and manage intelligent cloud solutions and applications to deliver tangible value and help our customers achieve more.
