SHIFT YOUR BUSINESS TO THE CLOUD

THE CLOUD SHIFT

Geek Patrol will navigate your path to the cloud and ensure a swift, secure and smooth transition. And once you're in the cloud, you'll need to evolve. Benefit from our tools, capabilities, ecosystem and unparalleled experience. Let us unravel the complexities of cloud navigation, optimized assets and help you rapidly achieve your business outcomes.

STRATEGISE

Get started fast with a tailored cloud strategy and plan with business objectives and outcomes informed by insights benchmarked for your industry. We help you prioritise the most urgent requirements and get ahead quickly and stay ahead.

- Infrastructure
- Timelines
- Cloud Assessment
- Workflows
- Cloud Strategy and Advisory
- Cloud Architecture

ADOPT

Take your first steps using our tools and highly optimised processes to deliver results fast. We will help you transition to the cloud with ease with a cloud architecture hand-tailored for your environment.

- Cloud Migration
- Cloud Management
- Cloud Optimisation
- Workflows

TRANSFORM

Our experience building industry-specific cloud-native platforms help you respond with speed and agility to opportunities and keep you ahead of the competition with these flexible cloud platforms at the core of your business.

- Digital Application Platforms
- Cloud Native Development
- Application Modernisation
- Cloud Integration
- API Framework for New Revenue Streams

WHAT NEXT?

CLOUD SOLUTIONS

We offer a range of cloud solutions designed to put you in control and get the most out of your cloud environment. Whether you need a fully implemented cloud strategy or simply enhancing your existing cloud infrastructure, Geek Patrol will help you get the most out of your investment.

DIGITAL WORKPLACE

Move your business ahead with the latest version of Microsoft Office, plus integrated collaboration services and a full suite of innovative Microsoft cloud products. Geek Patrol brings a new-found efficiency to your entire organisation by digitising internal work-flows, creating forms and applications and helping to build productised offerings from your own internal services.

MICROSOFT 365

Microsoft 365 is an integrated cloud-based solution that simplifies IT, amps up your data security and keeps employees' devices up to date with the latest from Windows 10 and Office 365. Thanks to the power of Microsoft's cloud your experience is there with you wherever you are, whenever you need it – backed by Microsoft's 99.9% uptime guarantee and 24/7 online and telephonic support.

OFFICE 365

The essential Office package for your team to get productive. Includes Outlook, Word, Excel, PowerPoint as well as a multitude of cloud services such as OneDrive, SharePoint, Teams & OneNote.

SECURITY & MOBILITY

Advanced security powered by cloud intelligence, that proactively protects your business. Windows Defender will detect and block fast changing malware variants and attacks, monitor behaviour and attacker techniques and leverage artificial intelligence to automatically investigate alerts and re-mediate complex threats in minutes.

WINDOWS 10

The latest, most secure operating system from Microsoft. All the benefits of Windows 10 with built-in protection from security threats at no extra cost with BitLocker and Windows Defender Antivirus.

MOVE YOUR ON-PREM ACCOUNTING ENVIRONMENT TO THE **AZURE CLOUD**

And benefit from
improved data security
and 24/7 data availability.

Access your accounts
from anywhere

Built-in level of
data security

Frequent updates &
faster upgrades

Reduced strain
on your internal IT

99.9%
Server Uptime

Responsive performance
as your system grows

Hassle-free
disaster recovery

Compliance with local &
global data regulations

CLOUD EXPERIENCE

FABRIK – OUR “BORN IN THE CLOUD” PLATFORM

CLOUD-NATIVE

Developing a from the ground-up a platform that serves a number of significant media & broadcast entities with real-time community engagement (messaging) and media streaming functionality, has resulted in our team acquiring deep skills and experience in building Cloud-Native solutions that require high availability, and reliability in rapid & unpredictable scalability.

STUDENT-BASED SPORTING PLATFORM

CLOUD-NATIVE

A sporting platform to administer, develop, coordinate and promote non-professional sport between higher education institutions in South Africa. Through the mobile applications, website, API and CMS, the platform provides sporting fixtures, results, live scoring, standings and video streaming to its stakeholders.

LEGAL FIRM OF ATTORNEYS

CLOUD-READY

A security-focused “lift and shift” migration of their on-prem server to Azure with access to their legal practice and conveyancing software, as well as file sharing synced to SharePoint.

GLOBAL SPORTS MEDIA PROVIDER

CLOUD-OPTIMISED

1. Migration of front-end systems (website, API, frontend databases and worker servers) from their on-prem environment to Azure.
2. The ‘Data Engine’ is the modern set of core systems which ingest, process and output sport-domain data to the client’s downstream front-end systems.
3. The cloud migration of the vast and complex array of the client’s legacy systems, which perform a variety of functions within their digital environment.

CUSTOMER HIGHLIGHT: **UWOYELA** IMPROVES EFFICIENCY FOR **REMOTE WORKERS**

"Geek Patrol performed our migration in a diligent and professional manner, and have continued to offer us professional and personable services."

- Juanita Coetzee, P.A.

FUTURE-PROOFING A GROWING BUSINESS

While the company began 15 years ago in South Africa, the oil pollution control specialist's phenomenal growth has seen them expand their presence and operations throughout Africa and the rest of the world – and outgrow their on-prem internal infrastructure.

CONTRIBUTING FACTORS

- The physical drives on their on-prem server were constantly failing.
- The server's operating system, Windows Server 2003, had reached **end-of-service** and the server was now vulnerable to **security threats**.
- The finance team accessing their accounting software from Geneva or elsewhere were experiencing sluggish performance, leading to failed transactions and frustration.
- The accounting system was available to remote teams only through a TeamViewer connection on a physical computer located near the server.

SWIFT ACTION CREATES IMMEDIATE EASE

Within a week, Uwoyela's accounting system was now in the Cloud available for any authorized person to access from anywhere – with the added benefit of **2x processing times** and a **99% reduction** in failed transactions.

CUSTOMER HIGHLIGHT:
LIFT & SHIFT AND APP MODERNISATION

	IaaS Resources	PaaS/SaaS Resources
