

Business Central Sapience Install

Once you have clicked on the installer link, you should see the following:

If a warning appears, it means that Microsoft has not yet verified this app for general availability on AppSource. Click Install to continue.

You will next see the following message. You can choose to change the name of the Power BI workspace into which the app is installed if you choose to. Click Continue.

Create a workspace for installing this app

The default workspace for installing this app is already being used in your organization. A workspace with a unique name must be created for this app. The name should help you identify the app later.

Enter a name for the new workspace

Business Central Sapience Basic 2/20/2020, 4:52:04 PM

Continue

Cancel

When the workspace has been created and the app is installed you will see this message. DO NOT Go To app yet.

Your new app is ready!

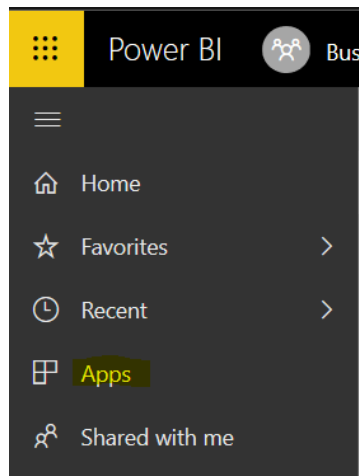

App 'Business Central Sapience Basic 2/20/2020, 4:52:04 PM' has been successfully installed.

Go to app

Click on Apps in the left nav of Power BI

Then Click on the Business Central Sapience Basic App.

Business Central Sapience...
