

Optimization & Multi-cloud Governance

Align your cloud infrastructure to your business requirements.

Through the continuous accompaniment of a Technical Account Manager, we help you to make your cloud platform well defined, putting the maximum focus on your costs being completely optimized.

Which are the advantages?

■ Cost optimization

We implement models that limit the cost to the maximum, so that you only pay for the resources you use, achieving important savings of up to 40% of the original scenarios.

■ Improved governance

To homogenize resources through a good tagging policy and with a good identification of business areas that help to have well controlled costs vs. budgets.

■ Increased visibility

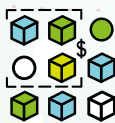

Mediante un dashboard sencillo y único con que el que podrás tener una visión global y con ello el control sobre todo tu entorno multi-cloud.

How do we proceed?

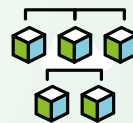

1. One single console

We identify and analyze the resources of your cloud environment.

2. Fastest optimization

We look for the best solution to manage your resources, reducing costs to the maximum extent

3. Improvement of control

We assign the budgets and define the alerts, according to the needs of your business.

4. Technological re-architecture

We define a more secure and efficient architecture for your cloud environment.
