Our DevOps Services

We help teams improve their development processes, upgrade their skills, and migrate to tools that make them more productive and predictable. Our DevOps / Agile coaches help implement your new environment while mentoring the team on best practices. We help customers with requirements, agile process, testing, backlog grooming, source code control, automated deployments, and more.

A DevOps Team's Mindset

- Accelerate software delivery across the enterprise
- Shorten feedback loops via process efficiency
- Get checked-in code into production continuously
- Make all work visible with defined success metrics
- Address technical debt as it happens
- Integrate operations into daily development work
- Code with monitoring, alerting, and telemetry
- Automate testing as code is built, by developers
- Real-time feedback through review and demo
- Simplify architecture, tools, & infrastructure
- Confidently release with automated CI / CD

Getting Started with DevOps

Our DevOps experts will work with your team to review current practices, identify alternatives to drive additional value, and demonstrate best practices for DevOps.

We work together to build a step-by-step guide towards producing predictable, measurable, innovative results that drive accelerated application delivery at scale.

Azure DevOps Expertise

- DevOps team of experts that reduce risk
- More than 200+ implementations
- Delivering ALM, SDLC, DevOps, and Agile services for more than 15+ years
- We work with Azure DevOps and supporting products both commercial and open-source

What Sets Us Apart

CEI is a group of curious and creative individuals, dedicated to providing the highest levels of service for our customers. Our team of experts believe in combining proven methods, technology solutions, and tools to craft extensible and maintainable applications.

Our employees are the key to our success – delivering amazing solutions and results for our customers, while fostering a culture of innovation and collaboration.

Quick Start Sessions

Our architects focus on providing seamless implementation of new technologies. We start by assessing an organization's business needs through strategy briefings, technology evaluations, and workshops. We then work with customers on designing an application architecture tailored to their needs.

Blended Mentoring

We pride ourselves on the ability to mentor client teams while assisting with implementation. We provide our client's with the assurance they will be able to further develop and support the applications we help build. Through side-by-side development assistance, we discuss best practices and techniques to extend value and reduce risks for businesses and development groups.

Our Practice Areas

- User Experience & Visual Design
- Architecture & Design
- Business Analysis
- Quality Assurance & Automated Testing
- Cloud Solutions
- Web & Mobile Applications
- DevOps & Agile Transformation
- Application Integration & Orchestration
- Collaboration & Content Management
- Bots, AI, & Intelligent Apps
- Big Data, BI, ML, and Data Science
- Database Services
- Mixed / Virtual Reality & Simulation
