

Azure Backup Managed Service

Ongoing backup support, management, and maintenance of Azure Backup

What's Included?

- Continuous monitoring, job failure, support, troubleshooting issues, and restorations.
- 24x7 monitoring, alert filtering and prioritization of incidents from Betach support center.
- Troubleshooting & full remediation of Azure backup job issues, and success validation for the next scheduled backup .
- File and folder restorations as required
- Annual backup test restoration.
- Guaranteed response time.
- Planned or emergency onsite assistance.
- Access to easy-to-use customer portal.

Why Cloud-Based Backup?

- Reduce unnecessary costs. Flexible to pick and choose the data you want to protect, for as long as you want to protect it.
- Deploys easily - Use Backup in Azure and on-premises, and with Windows, Linux, VMware, and Hyper-V.
- Protects against ransomware. Access control protects against unauthorized users performing critical backup operations.

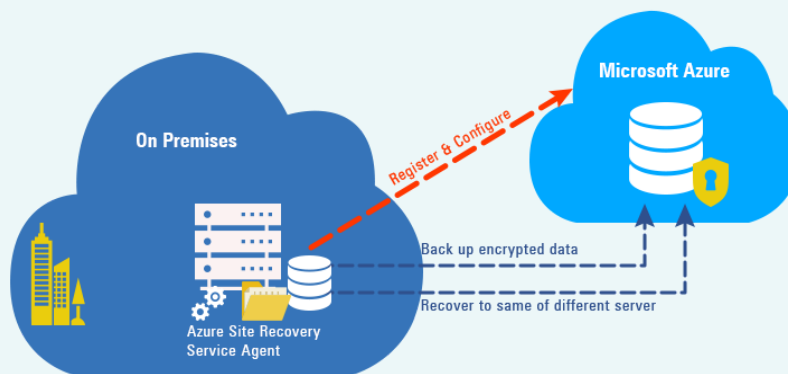

Efficient, Cost-effective, and Secure Azure Backup as a Service

About Us

Betach Solutions is an award-winning, Tier-One Microsoft Cloud Solutions partner. With multiple gold certified Microsoft competencies, we are uniquely positioned to lead digital transformations – creating greater value for our clients and partners.

Azure Backup as a Service Plan

- One Year Term
- \$0.50/GB stored/Month
- \$10 per device minimum charge
- Includes monthly monitoring and management of Microsoft Azure-hosted storage. Each month's pooled support time is not carried forward into subsequent months. Any additional support time required above the pooled hours amount in the month would be billed at \$150/hour.
