

1ClickFactory's Dynamics 365 Finance & Operations Solution Maintenance Services

Since the release of recent updates, Dynamics 365 Finance & Operations solution owners are facing a new challenge - how to effectively maintain a Dynamics 365 Finance & Operations solution to ensure that it's always tested and up-to-date with the automatic updates that are being rolled out every 6 weeks. 1ClickFactory's Dynamics 365 Finance & Operations solution maintenance services will help you to assess your current Dynamics 365 Finance & Operations solution readiness, create missing assets and will enable you to maintain your Dynamics 365 Finance & Operations solution and ensure that it remains up-to-date with each and every Finance & Operations update.

Our solution maintenance service offering consists of 3 distinct services:

- Dynamics 365 for Finance and Operations automated solution readiness assessment
- Dynamics 365 for Finance and Operations testing scenarios development
- Dynamics 365 for Finance and Operations solution maintenance service

Dynamics 365 Finance & Operations Automated Solution Readiness Assessment

With the release of One Version updates, Microsoft has introduced automated testing tools for Microsoft Dynamics 365 for Finance and Operations.

1ClickFactory's testing readiness assessment gives you visibility into your project's asset readiness for automated testing tools, assists you in identifying missing assets and helps you to plan and prepare for your Dynamics 365 Finance & Operations solution to be automatically tested for one version updates.

With 1ClickFactory's Testing Readiness assessment, you gain an understanding of your Dynamics 365 Finance & Operations solution against automated solution testing requirements, along with a clear plan detailing the actions required to bring your solution's assets up to the required automated testing standards. 1ClickFactory will also provide you with a fixed price proposal for a Testing Scenarios development service to bring your solution's assets up to automated testing standards.

Dynamics 365 Finance & Operations Testing Scenarios Development Service

Automated testing for Microsoft Dynamics 365 for Finance and Operations has a number of required prerequisites in order to successfully set up and run automated testing. Our Microsoft Dynamics 365 for Finance and Operations testing scenarios development service is aimed at helping customers to create missing assets so that they can become eligible for Dynamics 365 Finance & Operations automated testing.

Dynamics 365 Finance & Operations Solution Maintenance Service

Since the introduction of One Version updates, Microsoft Dynamics 365 for Finance & Operations receives new platform and application updates on a consistent basis. Ensuring that your organization has a strategy for keeping up with these changes is critical to your Dynamics 365 Finance & Operations solution lifecycle maintenance. 1ClickFactory's Dynamics 365 Finance & Operations solution maintenance service will provide your implementation with a predictable, timely and automated service to ensure that your Dynamics 365 Finance & Operations solution is always tested and compliant with the latest Microsoft update for Finance and Operations.
