Business events trigger modernization

Software end of support

Without software updates, your business can become vulnerable to cybersecurity threats, might not meet regulatory requirements, and might be out of compliance.

Contracts, licenses up for renewal

Rather than just renewing current outsourcing contracts or on-premises licenses, consider how you can leap forward through modernization.

Datacenter consolidation

Reduce or eliminate expensive datacenters, lower costs, and explore new possibilities with modernization.

Protect critical business assets

With the rise of modern threats, it is critical today to apply the right level of security on your critical assets and on the underlying infrastructure they are using.

Business need for new capabilities

Out of capacity or contending with Shadow IT? Remain relevant to business units by delivering new cloud capabilities and value with speed and agility.

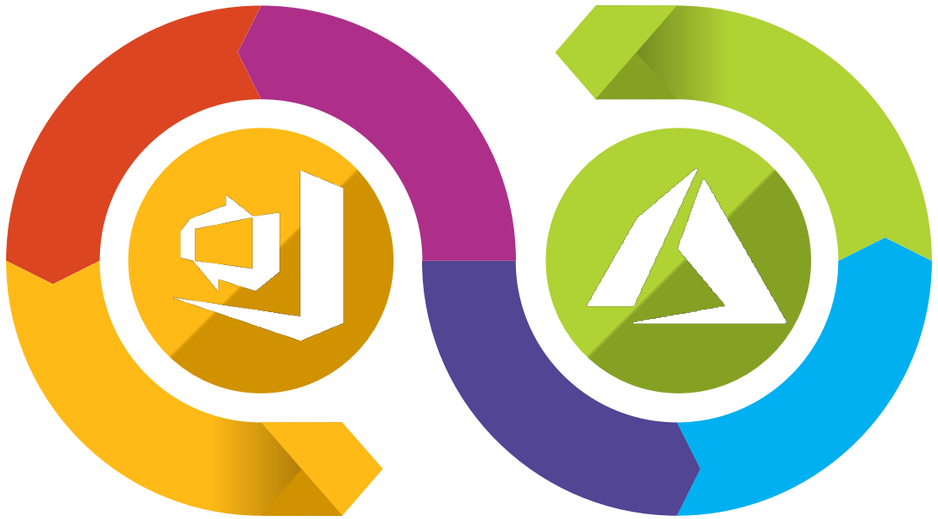
Solutions for Microsoft Azure

AgileDevOPS

Build, manage, and continuously deliver cloud applications.

AgileDev

Cloud enablement of legacy LOB applications and new services to leverage cloud platform services



AgileProtect

Data protection and restore services for files, database, servers, and more.

AgileDatacenter

Infrastructure migrations and deployments for cloud compute capacity and scale on demand

AgileSecurity

Unified and managed security services with enabled advanced threat protection.

AgileCover

Automated and optimized management and compliance.

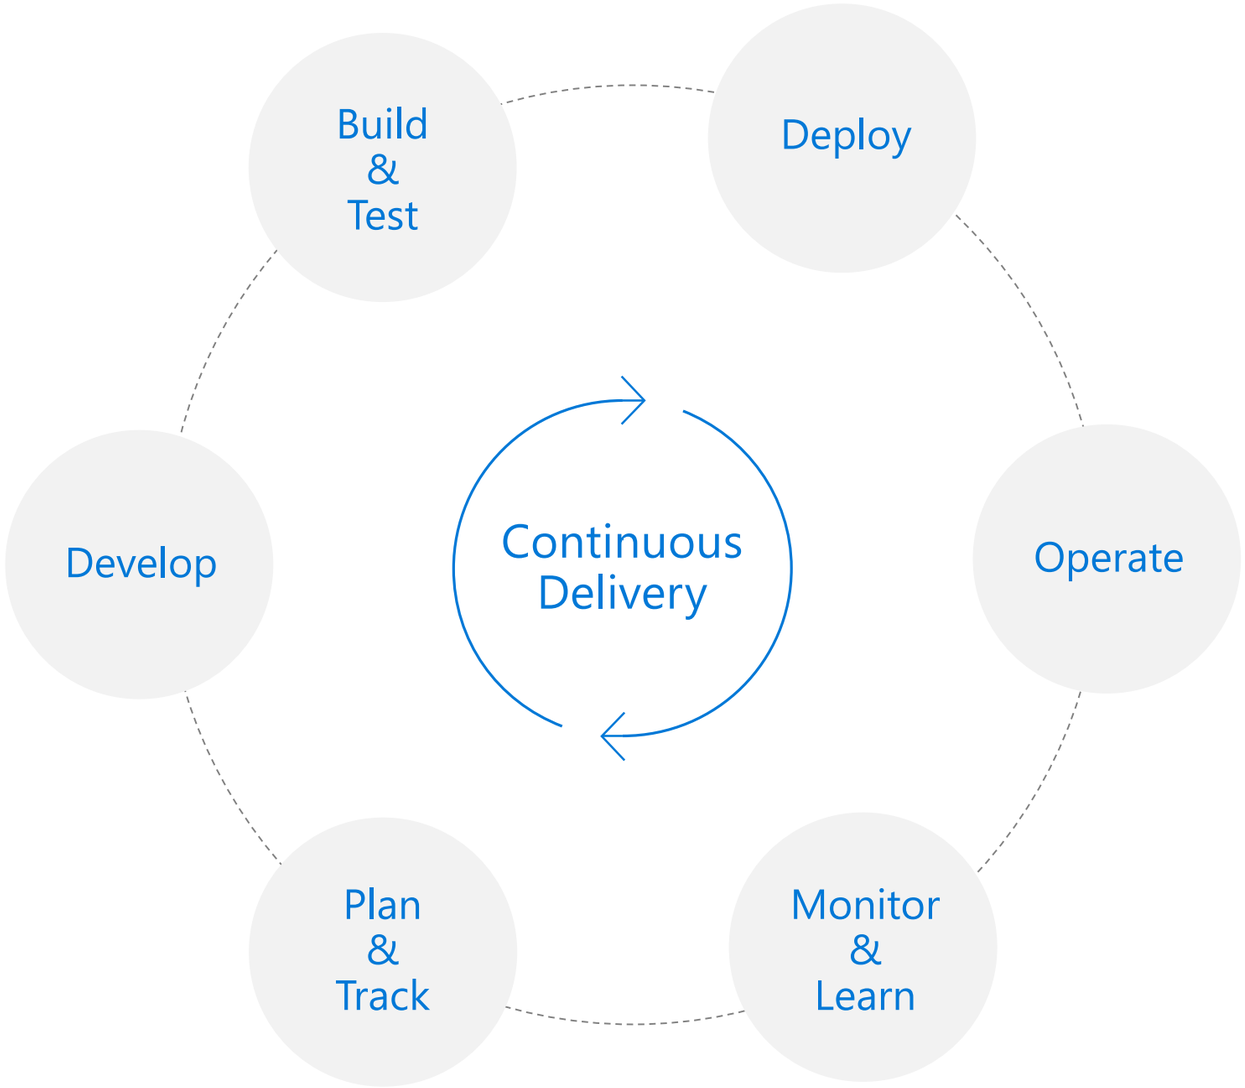
What is DevOps?

People. Process. Products.

> DevOps is the union of **people**, **process**, and **products** to enable continuous delivery of **value** to your end users.

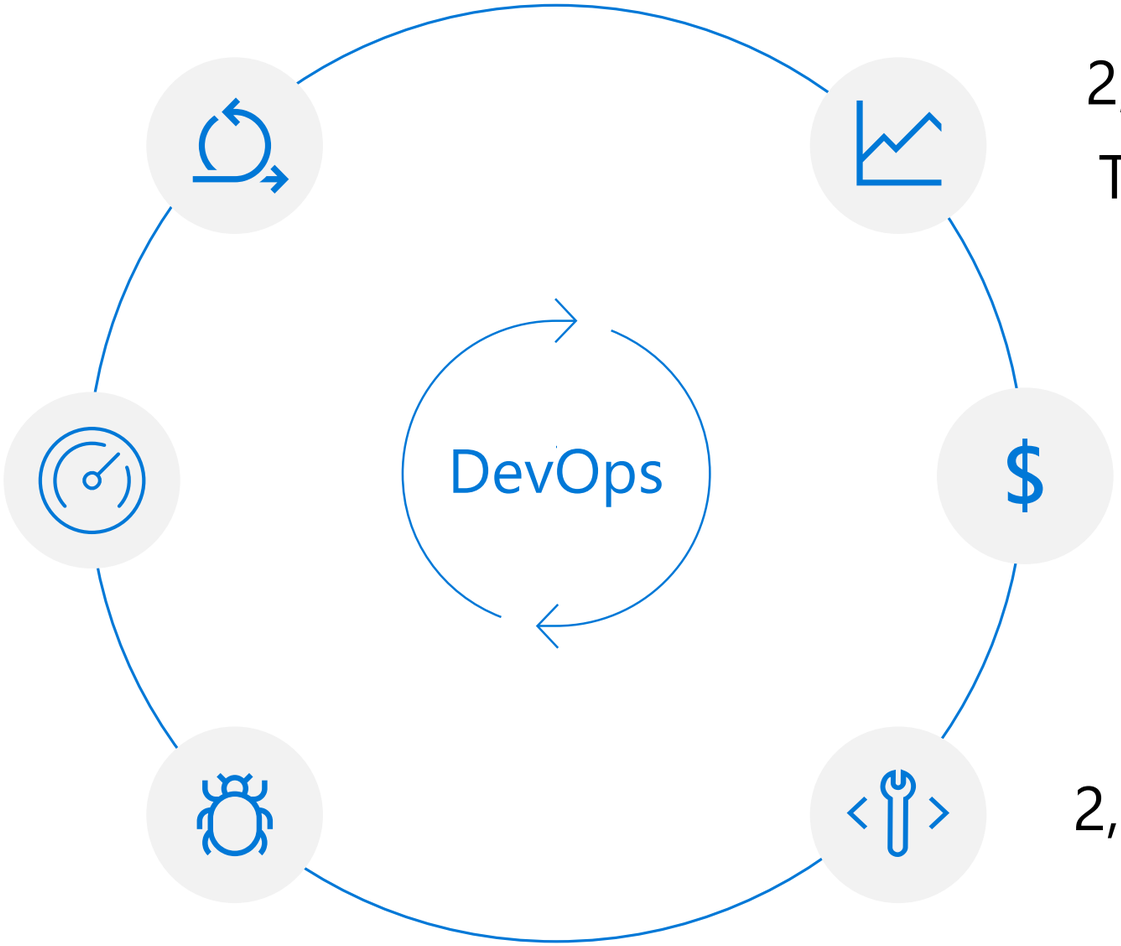


High Performance DevOps Companies Achieve…

46x Deployment Frequency

Faster Time to Market

7x Lower Change Failure Rate



2,555x Faster Lead Time For Changes

Increased Revenue

2,604x Faster Mean Time to Recover

Introducing Azure DevOps

Azure Boards

Deliver value to your users faster using proven agile tools to plan, track, and discuss work across your teams.

Azure Pipelines

Build, test, and deploy with CI/CD that works with any language, platform, and cloud. Connect to GitHub or any other Git provider and deploy continuously.

Azure Repos

Get unlimited, cloud-hosted private Git repos and collaborate to build better code with pull requests and advanced file management.

Azure Test Plans

Test and ship with confidence using manual and exploratory testing tools.

Azure Artifacts

Create, host, and share packages with your team, and add artifacts to your CI/CD pipelines with a single click.

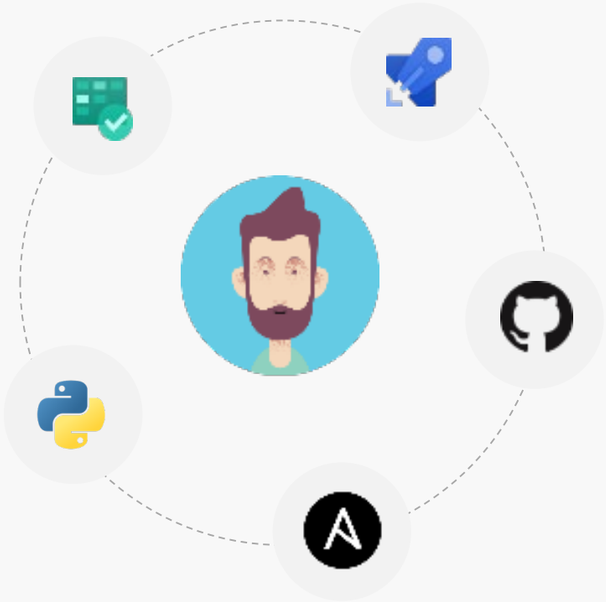
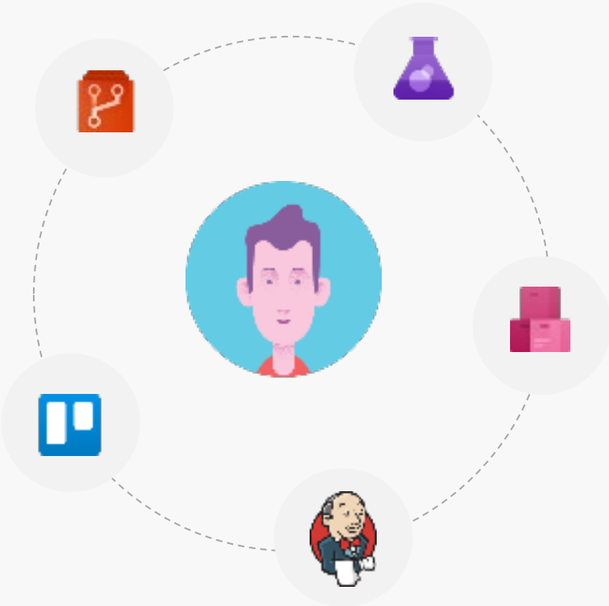
@DonovanBrown

Azure DevOps: Choose what you love

Any Language, Any Platform

Azure DevOps lets developers choose the tools and languages that are right for them





Mix and match to create workflows with tools from Microsoft, open source or your favorite 3rd party tools

Target any cloud, on-prem or both and deploy to the servers you need
