

# Data Center Transformation

## Evolve your IT platform into a more secure and efficient environment.

We believe in the maximum capacity and innovation of public cloud providers, as well as in the evolution of SaaS solutions for business applications.

After an analysis of the platform of each client, we define a solution tailored to their needs, providing the best architecture based on their needs and ensuring maximum scalability and availability of service.

We are committed to hybrid solutions that are fully integrated into management, with an agnostic vision of public clouds, always seeking the best solution for each client and avoiding vendor-locking from different providers.

# Which are the advantages?

## ■ Optimization

We use advantageous purchasing models by adjusting the resources you pay for, as much as possible.

- 1 or 3 years booking instances
- Automated purchase of Spot instances
- Rightsizing/resizing
- Automatic machine shutdown

## ■ Security

We create architectures using the solutions that best fit to your security requirements.

## ■ Flexibility and high availability

We implement scalable solutions and replication models that guarantee the service.

## ■ Innovation

You will be able to boost your business by implementing new solutions quickly and easily.

## ■ Green IT

We take you to more sustainable environments that allow you to reduce consumption and, thus, the environmental impact.

# How do we proceed?

## Initial assessment

*Closing boarding gates.*  
In 5 days and without any cost, you will have a vision of your future architecture and running costs.

## Due Diligence

*Warming up engines.*  
In this phase we will work together to define in detail the migration and all its dependencies.

## Migration

*Taking off.*  
The migration phase begins, always in line with your goals.

## Optimization

*Flying at 27,000 feet.*  
With the transformation phase we evolve your platform to a highly innovative one.

## Why do companies trust Enimbos?

We are one of the 8 Azure MSP partners in Europe, recognized as Gold DevOps, Gold Partner Cloud Platform, Gold Partner Application Development and Gold Partner Datacenter, which endorses our experience and knowledge in Azure environments.
