

Deliver claim checks on-site with confidence and convenience.

- Securely print checks on-site
- Increase customer satisfaction
- Ease customer pain in times of need

How does the solution work?

Step 1

Agents use the compact TROY Mobile 200 Printer and blank check stock to print secure claims checks on-site.

Step 2

The printer is easy to use and has a long-lasting battery. Agents can print checks within minutes.

Step 3

Blank check stock eliminates theft risks and high quality MICR ink prevents the chance of check fraud.

Step 4

Agents are able to print a full check that they can be confident in handing to the customer on-site.

Why would insurance companies need to print checks on-site?

The number one reason is, of course, to provide the customer with an unforgettable experience. Printing checks on-site will greatly increase customer satisfaction, and it is usually necessary to have an agent on-site during times of disaster.

Fires

Floods

Tornadoes

Earthquakes

Your product is made using all-new cartridges, unlike the unreliable refilled cartridges we tried previously.

Upon providing some samples to a couple of field users who have been plagued with MICR ink problems they couldn't say enough good things about this ink. To date I have had no reported issues from them and it's been a couple of months. That is outstanding.

We went to TROY because we knew you were a HP partner and we wanted to have the most success for this project as possible.

Reviews and experiences from your peers.

We work with leading insurance agencies across the US. Here is what they have to say about our solution.

What's included in the full solution?

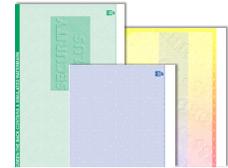

TROY Mobile 200 Printer

Small & compact printer, making it easy to transport. Weighs less than 9 lbs and has a long battery life.

TROY MICR Ink

The most secure MICR ink available. OEM quality ensures the integrity of the printed check.

TROY Blank Check Stock

Advanced fraud & forgery prevention built into the paper eliminates the need for pre-printed stock.
