

Cloud Adoption Framework - Microsoft Azure

AMTRA's Cloud Adoption Framework for Microsoft Azure provides customers and organizations the tools and resources they need to develop a pragmatic, prescriptive, actionable, cost-effective, and sustainable cloud adoption roadmap aligned with their business needs. Through our phased approach, the framework allows for an ease of implementation for cloud computing that complements, and is aligned with, your organization's current and planned investments in technology. It is managed by a delivery process that incorporates both AMTRA's highly-skilled architects, as well as our solutions delivery team; and serves to improve your organization's current IT environment - providing solutions that increases the capability of your people, process, and technology – to remain relevant to the ever-evolving needs and requirements of your business.

Phase 1: Stabilize

- Stabilization of Critical Infrastructure
 - Productivity Optimization
 - Business/ Technology Alignment

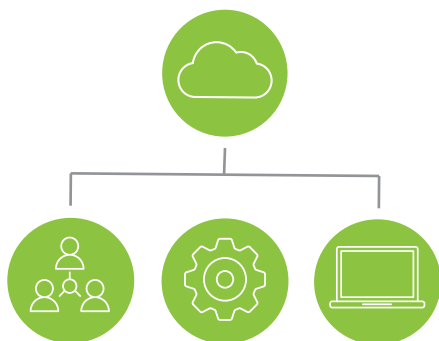

Phase 2: Initiate

- Project-based Workflow
- Build plan to address gaps in IT business support
- Improve protection of Intellectual Property (source code)

Phase 3: Execute

- Improve user security education/ hygiene & explore branch network connectivity savings
- Increase Software Development Maturity & Processes

Adoption Framework Overview:

- >>> Assess IT Environment
- >>> Secure Funding
- >>> Client Engagement Kick-off Meeting
- >>> Informative Workshop with AMTRA Architect
- >>> Review of Environment Findings
- >>> Client Presentation of IT Environment Scan Findings
