

Digital Procurement for Agile Acquisition

Insight | Productivity | Compliance

In today's federal procurement environment, agencies are looking to optimize their business operation to support agile acquisition. Vana's Digital Platform for Contracting (DPC) tool is a flexible and configurable solution that streamlines the procurement lifecycle from contract initiation to contract close out while providing records management.

Contracting Solution for Government

Automation & Operational Excellence

Increased productivity and efficiencies while reducing cycle-time, task management, workflows, digitalized notes, phase management

Visibility with Reporting & Analysis

Increased visibility into organization's contracting actions and status, cycle-time, audit history, custom analysis, data-driven results

Secure Role-Based Collaboration

Provide simultaneous access to multiple users, locations, processes and documents within the contract file

User Experience and Training

Ease of use, business rules driven for FAR compliance contract files, robust search, with on-demand training and references at your fingertips

Flexible Deployment Model

Cloud or on-premises

Integrated Review & Approval Process

Support regulation and policy compliance with a fully integrated and collaborative contract review and approval capability

DPC transforms your procurement activities by leveraging technology to streamline the procurement process while providing visibility, transparency, and reporting during the procurement life cycle.
