ETG CONSULTING

OVERVIEW

Dynamics AX **Performance Review Service** consists;

- Hardware and Software Check
- Data Collection
- Reporting
- Action for high priority findings

FEATURES

ETG checklists will give an assessment of your Dynamics AX ERP to identify the areas in which performance can be restored / enhanced through Microsoft's best practices.
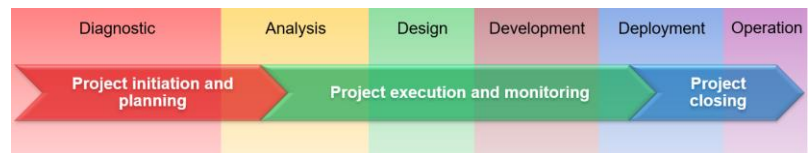

We use Microsoft's best practices tools like Perfmon, Netmon, SQL Server Profiler, Trace ParserTool etc.

This service contains;

- Infrastructure check (Disk setups, OS, Network)
- SQL Server check (Settings, Indexes, Queries)
- AOS (Settings, Cumulative Updates (CU), SP)
- Both Server side and Client side
- X++ performances
- Data Cleaning

DYNAMICS SURE STEP

This Service is the "Operation" part of the Microsoft Dynamics SURE STEP methodology
