# Wilsons Knight Frank

Specialist Jersey based estate agent with access to the widest availability of both national and international purchasers via the proven Knight Frank global network.

## THE PROBLEM

Wilsons were previously migrated by legacy on premise email services to G Suite and to Egnyte (hybrid cloud file services). Following a business merger decision with "Knight Frank" Wilsons approached 848 to review the current infrastructure and LOB applications with a view to ensure systems could be integrated and collaboration would be effective.

## THE SOLUTION

We deployed Azure Backup Server to backup diverse workloads which included VMWare virtual machines, Microsoft SQL Server databases, files/folder backup, system state backup for Windows server and Exchange backup.

848 also recommended a migration from Gsuite to Office 365. This improved collaboration between KF and Wilsons using Skype for Business • Exchange Online / Outlook email which integrates more tightly with the existing CRM package.

## THE RESULT

Azure backup provided a simple and intuitive solution for their diverse workload backups and provides the agility to backup their ever-growing data. It also helped them significantly reduce their costs by providing a pay-as-you-go solution and they don't need to provision extra storage to meet future requirements.

Seamless migration with no downtime and the engineering services focussed on carrying out 1-to-1 familiarisation sessions and covering the differences and tips for using Office 365.
