## MANAGE YOUR BUSINESS FINANCE – WHEREVER YOU ARE

Move your on-premise accounting environment to the Azure Cloud in a week, and benefit from improved data security and 24/7 data availability.

From sluggish processing times to failed transactions, an on-prem server for your accounting software can be finicky at best, slowing down your organisation and adding unnecessary strain on your IT resources & spend.

The Cloud provides flexibility, reliability and ease that need not cost you more.

### WHAT IS MICROSOFT AZURE?

Microsoft Azure is an ever-expanding set of cloud services that provides the freedom to build, manage and deploy applications within a private and controlled environment. Your custom services can be seamlessly migrated and then modernised to take advantage of the latest services, eliminating the cost and hassle and expense of hardware and software procurement and management.

### ON-PREM TO CLOUD IN A WEEK? HOW?

Our quick & seamless process will **digitally transform** your business with zero downtime!

- 1) **ASSESS** your existing services & future need, and present a plan & timeline.
- 2) **MIGRATE** your data into your secure environment.
- 3) **OPTIMISE** your Azure services for best performance and lower costs.

## WHY GROWING BUSINESSES LOVE AZURE

Access your accounts from anywhere

Built-in level of data security

99.9% Server Uptime

Hassle-free disaster recovery

Frequent updates & faster upgrades

Reduced strain on your internal IT

Responsive performance as your system grows

Compliance with local & global data regulations

*"Geek Patrol performed our migration in a diligent and professional manner, and have continued to offer us professional and personable services."*

- Juanita Coetzee, Enviroshore
