Armanino provides a comprehensive upgrade assessment that validates your current system with a full analysis of:

- Functional use of application
- Technical complexity
- Systems architecture

Regardless of what version of Dynamics AX your company is running, Armanino can help bring you current. Our team of consultants provide best-practice guidance and work alongside you to plan, prepare, execute and deliver an upgrade that's on time and on budget.

### WHAT TO EXPECT

A comprehensive Dynamics 365 roadmap for your organization, complete with short-term, mid-term and long-term improvement recommendations.

### ABOUT ARMANINO

We take pride in our track record of Microsoft Dynamics upgrades and have developed tools to streamline the process and reduce costs, which assist in identifying infrastructure or customization risks ultimately enabling us to provide comprehensive upgrade assessments. Additional benefits of partnering with Armanino, include:

- Continuing Dynamics user education programs
- Ability to provide resources for every stage of your business
- Cutting-edge industry solutions
- Award-winning service
