- DevOps

### Consistent & Connected Experiences

### IoT Connected Enterprise

IoT solutions to monetize data, manage & optimize assets, offer connected products & experiences, intelligently automate processes, and enable smart monitoring.

- Connected Platform
- Stream Analytics
- Data at Rest Analytics
- Apps & Automated Systems

### Insights & Actionable Intelligence

## WHY CLOUD FIRST

We believe Cloud to be a strategic and foundational enabler for technology driven digital business transformation. The Cloud offers advantages on an ongoing basis with on-demand and rapid resource elasticity for scale with smarter use of capital. With a Cloud-First strategy, enterprises can:

- Accelerate idea-to-solution lifecycle time
- Lower startup costs and investment risk for innovation
- Achieve on-demand and rapid resource elasticity for scale
- Leverage smarter and easier budget allocation
- Improve productivity with broad connected access
- Maintain higher reliability and security at scale

## CLOUD AS A DIGITAL PLATFORM

We are helping customers harness native cloud native capabilities to build their digital future with:

Modern  
IT

Products  
& Services

Business  
Apps

IoT  
Solutions

DevOps  
Capabilities

Big Data  
Analytics

## WHY PARTNER WITH US?
