

## PCoIP® Deployments

Teradici Professional Services

### A Personalized Solution in Private or Public Clouds, Designed and Installed in Under 5 Days

#### AT A GLANCE

- Define business needs
- Design the deployment
- Deploy PCoIP solution
- Evaluate and report

Jumpstart the transformation of your IT architecture to keep up with the demands of your business growth. Teradici PCoIP Deployments help you find an [All Access](#) solution to futureproof your business at a fraction of the time and cost it would take to do it yourself. Our certified team will show you the benefits of using our PCoIP protocol and how to set up a virtualized application and workload environment to meet challenging IT demands and solve traditional limitations of the workspace.

A PCoIP Deployment is simple: our team will help your business move up to three applications or workspaces to any supported public cloud, on-premises data center, or hybrid environment. Once deployed, we will validate the PCoIP solution via extensive user experience testing with your staff and provide a full total cost of ownership report upon completion. Within five days, you will have a secure, fully functional PCoIP deployment and a complete understanding of how Cloud Access Software could benefit your organization.

#### Phase 1: Define Business Needs

Choose the three applications or workloads you want to deploy to the host environment. Our team will suggest configurations that optimize workstation performance.

#### Phase 2: Define Design and Deploy Cloud Access

Teradici will work with your team on-site to quickly and securely deploy the defined PCoIP Deployment.

#### Phase 3: Validate and Evaluate

Post-deployment, our team will validate the solution with you and provide performance measurement of the live system. We will perform a user experience, baseline, and workload analysis so that you can be confident in the solution.

## PCoIP DEPLOYMENTS INCLUDE:

Hosted applications	3
Users	3
Global endpoint locations	3
Endpoints	3
Host	1
Personalized architecture diagram	Yes
User experience analysis	Yes
Performance baseline	Yes
PCoIP Health Check	Yes
TCO analysis	Yes
Workload analysis	Yes

## PCoIP DEPLOYMENT TIMELINE:
