"We have lots of data — now what?"

Organizations of all sizes want to make better decisions and they need to make these decisions faster. Let DSI and our team of Data Scientists come in and brief your organization on how we can help you leverage the power of Microsoft Azure to use Machine Learning and Advanced Analytics today. In this 1/2 day briefing, you will learn:

- Overview of Artificial Intelligence
- Industry Use Cases
- The DSI Data Science Process
- Use Cases for your industry

At the end of the session, we will whiteboard with you to determine a good candidate for a data science proof of concept.

1 Data Collection & Governance
2 Ad-hoc Analysis
3 BI tools, Dashboards, Automated Reports
4 Advanced Analytics, Predictive Modeling
5 AI, Cognitive Computing & Big Data Analytics
