Azure Cloud Migration Briefing

iV4 will help you understand the value of moving your applications, data, and infrastructure to the Azure cloud.

This 1-hour briefing provides a high-level overview of Azure platform options, how they can transform your on-premise data center and the costs to maintain it, as well as, the processes involved in implementing a successful migration.

"Asking questions is the first way to begin change"

Kubra Sait

Most organizations are aware of the digital transformation that Azure Cloud services can provide, but the challenge is where to begin and how to properly evaluate the benefits of undergoing such a transformation.

The first step in understanding Azure is through iV4's Azure Cloud Migration Briefing. This 1 hour briefing is designed to help clients comprehend and evaluate the Azure platform choices available to them.

The first phase of iV4's methodology framework is "Engage", which is an opportunity for iV4 to gain an understanding of how your organization functions, the business drivers behind the interest in a cloud transition, and the mechanics of how to get there. iV4 can then provide a clear, streamlined transition using a proven implementation methodology based on your organization's unique requirements.

Q&A and Next Steps

iV4 has been delivering Microsoft Cloud Solutions since its inception, with tens of thousands of users successfully migrated to Office 365 and workloads exceeding 200 TB migrated to Azure.

We operate with a cloud-first mentality and are proud to be one of Microsoft's top partners.

The result of iV4's Azure Cloud Migration Briefing is a clearly-defined roadmap on a long-term view of the costs and benefits linked to Azure's subscription model and real-world situations for a clear understanding of what Azure can do for their organization.

Whether you are just starting out or already leveraging Azure, iV4 can help.
