ABOUT SEMANTIVE

SEMANTIVE

Two triumph cards for our clients are in-depth knowledge of different types of data and AI.

Data Analysis

We develop a solution, from scratch, for Fortune100 companies, which turn unstructured data, gathered world-wide by different partners, into business value.

AI expertise

We have developed a number of AI solutions which work in products of brands such as Bosch or in our own products in the healthcare and security industry.

We use built-in AI components to accelerate development

We enhance built-in AI services to increase the value

We create custom AI solutions to leverage your market position

As legitimate specialists in data and AI **we align with Microsoft Azure vision** to make technology available to everyone, everywhere and at enterprise level to enhance innovation.

To do so, we don't need to reinvent the wheel that has already been invented in past solutions but **focus on the end value and add custom components** for use cases your business requires.

Why do we deliver our solutions on Azure? Because the right cloud platform with built-in services enables faster, more efficient and more secure products for our partners in meaningful time... And time plays a significant part in decision making.

*You contact us.
We deliver.*

Competency

We have **gold competency in Data Analytics** and **Application Development** on Azure because of our in-depth knowledge and experience in solutions we create beyond Azure built-in services.

Recognition

Successes of our partners made us **recognized by Deloitte's Fast 50** award as one of the fastest growing IT company in CE and #1 in Poland for the year 2019.
