Free Sql Server 2008

Azure Migration

Extended Support of SQL Server 2008 Ended

SQL Server 2008 and SQL Server 2008 R2 will no longer be supported by Microsoft starting in July 2019.

Avoid next challenges and vulnerabilities caused by end of support:

NO UPDATES	COMPLIANCE	TIME PRESURE	HIGHER MAINTENANCE COSTS
• No access to security or non-security updates	• Risk to fail to meet compliance standards and industry regulators	• No time for upgrade to recent version due to complex infrastructure	• Maintaining legacy servers gets expensive quickly

SECURE now – transform when ready

01 SECURITY

Three years of Extended Security Updates at no additional charge

02 COMPLIANCE

Security built into Azure, plus more than 70 compliance certifications

03 TIME

More time to modernize your workloads

04 COST

Use existing licenses and save up to 55% with Azure Hybrid Benefit

05 MODERNIZATION

Comprehensive transformation plan for your applications to gain maximum benefits in Azure

06 MANAGED INFRASTRUCTURE

Extend your IT team with VIAcode Managed Services to improve your IT processes

ASSESS

Provide Performance, Storage, and Security recommendations using Data Migration Assistant or Azure Migrate

Choose migration method by business criticality and data size

MIGRATE

Migrate SQL Instances to Azure VMs
using the DMA, manual backup/restore,
or SQL Server Transactional Replication

Validate migration result using thorough testing

OPTIMIZE

Right-sizing and manage costs, strengthen security and ensure compliance

VIAcode will plan your app modernization to complete its transformation for maximum benefits on Azure

Offers Details

- Free migration of your on-premises SQL 2008 workloads
- 2 weeks duration for assessment and implementation
- Up to 1 Terabyte of data
- Up to 5 migrations
- Post-migration support options using VIAcode Managed Services for Azure are available

VIAcode

We want to make your cloud operation so simple and cost effective there is no reason to do it yourself

Services

Azure Implementation

- Migration
- Automation & DevOps
- Operationalization

Application Development

- Rearchitecting to Cloud
- User usage tracking
- Monitoring & Log analytics

Managed Services

- Infrastructure
- Cost
- Security
- Backup & Disaster Recovery

VIAcode

Differentiators

- Part of Microsoft Product teams
  MS IT, Azure portal, SCOM, Service Fabric, Azure Stack, SQL Server
- 12+ years of experience delivering Microsoft-branded monitoring solutions
  SQL, Windows OS, Azure, O365, Azure SQL DB, Azure Stack, DNS, DHCP, NET/Java SCOM Management Packs
- Development and Maintenance of Microsoft Azure Demo platform for thousands of Microsoft's Cloud Solution Architects
