

Microsoft Dynamics 365

Finance and Operations (formerly AX)

Built for Midsize to Global Enterprises

Microsoft Dynamics 365 for Finance and Operations is Microsoft's most robust and comprehensive business management solution for large and midsize enterprises. A comprehensive manufacturing, financial and retail solution, Dynamics 365 lets you redesign and automate processes faster, easily respond to change, manage global expansion and scale effectively.

Dynamics 365 lets you run your entire business on one common data model in the world's most secure cloud, Azure, or on your premises, enabling true integration between all of your applications and business processes.
