ACCELERATE
ENGAGEMENT

Harnessing the potential of cloud-based technologies is our passion. We view this endeavor as foundational to our customer's success in the 4th industrial revolution-based economy.

Organizations must embrace new methods of nurturing innovation and managing their Information and Technology resources. The Azure Accelerate engagement begins with a current state assessment of your Information and Technology capabilities. This is followed by a period of incubation that instigates a well-defined path forward for your organization.

The team at Applied Cloud Systems are former business leaders and industry experts who have empathy for the paths that must be followed to successfully embrace new operating models and methodologies.

YOUR

ENGAGEMENT ACTIVITIES

INNOVATION

Develop an innovation model for identifying "quick actionable wins" and ongoing service enhancements.

MATURITY ROADMAP

Measure current Information and Technology maturity and develop a pragmatic roadmap for Azure based technology adoption.

OPERATIONS

Develop a cloud operating model that leverages industry frameworks and Azure best practices.

STAKEHOLDER ENGAGEMENT

Align Information and Technology needs and capabilities with the desired business outcomes of the organization.

PROGRAM MANAGEMENT

Provide executive level leadership and oversight to the enabling of cloud based innovation and operations.

KNOWLEDGE TRANSFER

Train and mentor Information and Technology staff on cloud based methodologies and technologies.
