

Cooperation to protect and create value in the changing environment

PwC Poland is part of a global network of PwC firms operating in more than 150 countries around the world. Our mission is to build trust in society and solve important problems. Especially in digitised world, our experienced team of cyber experts offer a range of cybersecurity services under four key areas: Strategy, Transformation & Risk, Implementation & Operations, Privacy & GDPR and Incident & Threat management.

We help organisations to move security operations to the next generation: cloud-enabled, automated, AI-powered and integrated with digital transformation. Our team of cyber experts from Poland, Czech Republic, Hungary, Romania, Bulgaria, Latvia, Estonia, and others in CEE, using advanced technology: cloud native security analytics, automation and threat intelligence is able to provide professional security operations to any organisation regardless of its localization.

Transformation

- Security assessment (technology, people, processes) and strategy development
- Cyber risk management and governance (GRC) (incl. assets identification and prioritization)
- Design and implementation of information security systems and business continuity management systems
- Effectiveness Assessment of the security solutions and ongoing monitoring
- Management of IT suppliers in the context of data continuity and security
- Security of OT systems

Implementation and maintenance

- Security Architecture
- Security Technology Implementation (SIEM, WAF, DAM, PAM, Anti-APT, OT/SCADA Monitoring)
- Security Operations Center (SOC) design & build
- Implementation of Security Orchestration, Automation and Response (SOAR) systems
- Managed Security Service Offerings
- DevOps / maintenance of security platforms (SIEM, EDR, VM) services
- Qualitative analysis of SIEM systems (Health Check)

Privacy / GDPR

- Privacy assessment (regulatory, maturity, impact and data-use assessments)
- Privacy transformation
- GDPR readiness assessment and implementation
- Personal data governance
- Data leakage prevention
- Support in documenting and reporting violation incidents of the rights or freedom of personal data

Violations / Incidents

- Vulnerability assessment (Pen-testing, Red-teaming, PwC STRIKE, Purple Team)
- Compromise Discovery
- Incident readiness and security awareness programs
- Security Operations – monitoring and Incident Response
- Threat and vulnerability management
- Breach indicator assessment
- BCP/DR
- Breach Response Plan
- Crisis simulation

Our Mission

The category of one **Cybersecurity & Privacy** team building digital trust for leading organisations

Get Started

By assessing your strategic needs, know your critical digital assets, and how you can protect

Evolve and Transform

Your systems and processes to adapt to risk profile and cyber threat landscape

Get Confidence

In your people, systems, processes - to protect, monitor, detect and respond

Manage Crisis

Manage Crisis and any security incidents, privacy violations, data breach

A Wide Spectrum of Services

Our services are built around the core challenges you are facing daily

From strategy to implementation...

Prepare & Protect

Detect & React
