

MANAGED CLOUD SERVICES FOR MICROSOFT AZURE

WHAT IS IT ABOUT?

Microsoft Azure gives new opportunities and innovation velocity to clients. Business is seeking for attractive services to solve their challenges with little impediment getting stuff up and running. The cloud empowers IT, offering a higher value to the business for their cost and time. Nowadays, IT delivers extensive IT infrastructure following traditional IT processes, appearing to business less attractive. Managed cloud services for Microsoft Azure helps IT to provide the attractive opportunity of Azure to the business much faster, more reliable and at higher scale. T-Systems automates the deployment of Azure resources and prepares Azure hosted virtual machine images for deployment in minutes. We monitor, patch and secure the infrastructure while we respect well established processes. We bridge traditional IT infrastructure deployment and management and help IT to a new way to deliver IT to the business in times where know-how diminishes, but complexity extends.
