

Azure Optimisation Service Details:

Our Azure Optimisation Service will provide you with a detailed analysis of your current Microsoft Azure consumption and costs.

Use our insights for visibility to current spend and our recommendations to explore every opportunity to save money and reduce waste.

PHASE 1 Kick-off

Understand your current and future state. Review your migration status and current monitoring practices. Connect to your Azure subscriptions with read-access.

▶ Interactive 1-hour Meeting

PHASE 2 Discover

Inventory all Microsoft software across on-premises and cloud infrastructure to provide a baseline. Monitor Azure consumption over 4 weeks.

▶ 4 weeks of Proactive Monitoring

PHASE 3 Decide

Review report findings. Reach an agreement on recommendations. Prioritise workloads to drive action post-discovery.

▶ 2-hour Meeting

Your Azure Optimisation Review Includes:

Cost Reporting

View all spend vs budget and inventory thresholds.

Resource Utilisation

View your current state cloud assets and all services being utilised.

Cost Management

Review overall Azure spend and savings opportunities.

Buying Recommendations

Recommend right-size targets and best purchase options including Test/Dev offers and Reserve Instance purchasing.

Cloud Management

System recommendations for monitoring, alerting and governing cloud spend and resource consumption.

Governance & Security

Continual consumption dashboards highlight spend against policy and budget and reduce cost overrun risks.

Cost

▶ \$17,750*

*For up to 500 servers
