## Release yourself from old legacy and make your IT business future ready

**Are you stuck in old, expensive and operating heavy IT,** that no longer delivers at the pace the business is demanding? With Azure Data center Service you will get an efficient and secure transition from traditionel On-Premise data center to a modern and future-proof data center in Azure.

### Proven technology and approach

Get full control and insight into your data center migration. Our years of experience and proven method ensure you an efficient move of workloads to Azure cloud. Based on a Datacenter Roadmap that describes the vision and framework for the project, the foundation for the work on building and moving to a cloud based data center is created.

### The modern data center

Azure opens up a world of opportunities. From 1-1 moving your current data center to building a modern DevOps and Infrastructure as Code based data center. Regardless of your starting point and vision for your future data center, our Datacenter Roadmap ensures you a right start with Azure and helps you taking advantage of the many opportunities without getting lost.

### Operation tools & Managed Services

timengo uses standard Microsoft Azure services as the basis for our migration and managed services.
This means that future operations are run securely and with a strong focus on environmental insight, whether you choose to operate your platform yourself or use timengo's operating concept and Azure Managed Services.

### Get control of the economy of Azure

You will understand what your IT operations will cost in Azure and take full advantage of our expertise in optimizing Azure technology, licensing and costs.

## 360° approach to cloud

Azure Datacenter Service is an element of timengo's Cloud Platform model.

Cloud Platform is a complete method for the transition into a secure, coherent and future-proof Microsoft cloud based on Azure and M365.

The method ensures financial overview and insight into your cloud journey from plan to operation. With timengo's Service Catalog, you will be offered a wide range of Managed Services that ensure efficient operation, monitoring and maintenance of your cloud platform.
