

How do you protect your cloud?

INTO THE BREACH

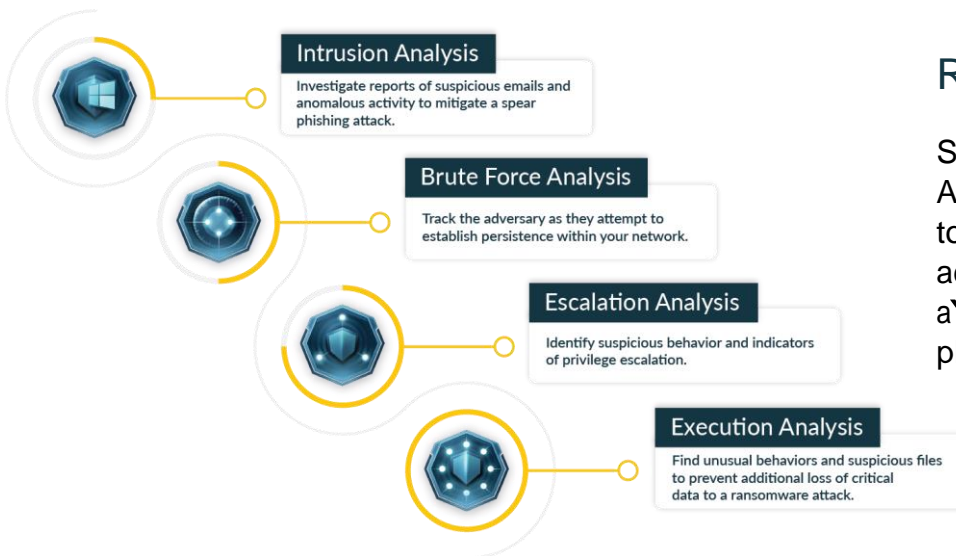

Brought to you by KAMIND IT and Circadence

An immersive
cyber defense
experience with
Microsoft Cloud
Security Tools

ShiMs to the cloud alter security challenges. It is more important than ever to use with tools designed to support flexible, dynamic cloud environments.

This technical, hands-on experience puts you in the driver's seat to test drive Microsoft's latest security technology including Azure Sentinel, Azure Advanced Threat Protection, Office 365 Advanced Threat Protection, Microsoft Cloud App Security, and Microsoft Defender Advanced Threat Protection.

Visit www.kamind.com/cybersecurity to enroll or request more information about KAMIND Cybersecurity Deployment Programs

Real World Accuracy

Step into the role of a Cyber Defense Analyst and use Microsoft cloud security tools to investigate indicators of an advanced threat that is conducting an attack on your network across multiple phases of the kill chain.
