

Power BI Assessment

A Clear Roadmap for a Data-Driven Culture

Gold
Microsoft
Partner

PAIN POINTS

- Do you want to regain control over your self-service reporting processes and **re-align** them with your **corporate objectives**?
- Do you have a **clear plan** to move **from awareness to adoption** stage?
- Have you implemented Power BI, but you **lack sufficient governance and control**?
- Do your business users get **right level of support and training**?
- Could you benefit from a **clearer and more streamlined self-service analytics process and framework**?

The Data-Driven World

- Enables delivering an **end-to-end**, “**on time and in full**” customer experience.
- Data and analytics are usually most important in driving **operational excellence** and fostering **better customer relations**.
- Innovative organisations use new technologies and insights to go **a step further** and **rethink their whole strategy**, or even come up with **new and creative business models**.

The Data-Driven Organisation

Aligning Business & Data

If you're looking to become a data-driven organisation, **Agile Analytics** is a perfect partner to **get the basics right** and help you **build a solid foundation for your data and analytics environment**.

We will also inspire you to **update your business model**, based on data, and **provide tracks for continuous optimisation**, so you can continue to **unleash the full potential of your own data**.

It Needs to Support Your Corporate Objectives

Power BI

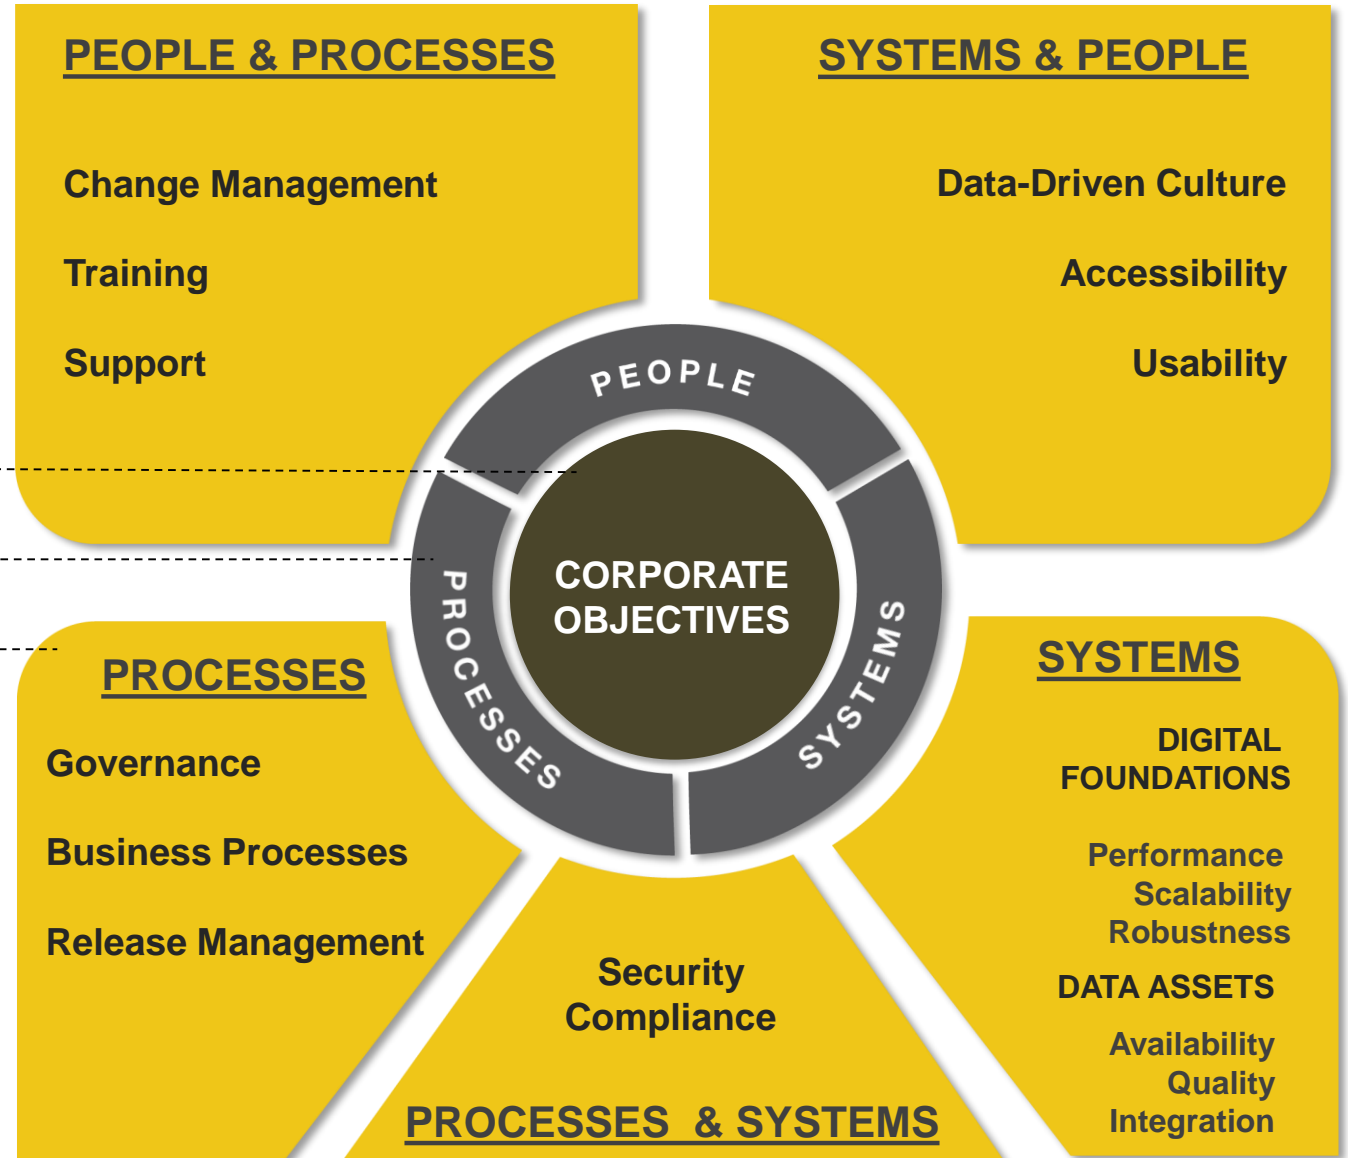

ADOPTION FRAMEWORK

A FRAMEWORK FOR DATA-DRIVEN CULTURE

- WHY? ●
- HOW? ●
- WHAT? ●

Being data-driven requires an overarching data culture that couples a number of elements: including **high-quality data**, **broad access**, **data literacy**, and **appropriate data-driven decision-making processes**.

We have developed a unique framework to enable companies to **fully cultivate a data-driven culture**.

Power BI Adoption Framework by Agile Analytics

Why Should I Plan for Adoption?

To develop a **data-driven culture** within the organisation in order to **rapidly answer business questions** and **make more informed decisions**.

To provide **training and guidance** to develop the **skills** required to get the **most from your investment in BI**.

To develop the mindset associated with **agile delivery** of Data Analytics.

To help with the **transition from legacy tools** to more **scalable, maintainable and collaborative platforms**.

Areas of Assessment

Business Objectives

Infrastructure & technical components

Security & Governance

Team Skills & Structure

Operational Processes

Program Features

Focus on your Business Priorities

3 Days Engagement

Deliverables

- Workshops with IT & Business stakeholders
- A full report on the as-is environment highlighting the issues and potential risks
- A high-level roadmap and implementation plan for Power BI deployment, governance, and adoption
- Plan for ongoing checkpointing and support

Fixed-Price

- \$5,000

Agenda

Day 1

- Discovery of your current Power BI environment.
- Reviewing the architecture, design and implementation
- Internal team skills assessment

Day 2

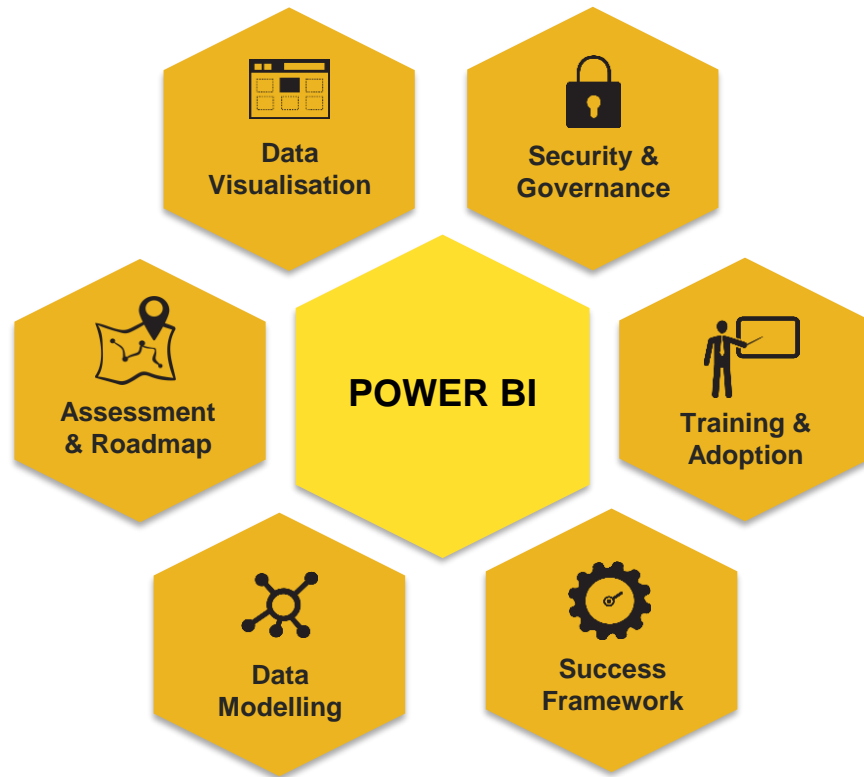

- Develop a detailed implementation plan
- Highlight the potential issues
- Recommend best practices

Day 3

Present the results and plan for the next steps.
