

## Microsoft Azure PaaS and IaaS

### Move your apps and infrastructure to the cloud to compete in the modern economy

Companies across all industries are facing intense pressures to compete on cost, agility, and scale. Moving your applications and infrastructure to the cloud will lower your costs dramatically, make you much more nimble - and enable you to focus precious resources on your core business strategy rather than on IT operations.

With Wintellect, a Microsoft Gold Cloud partner, and the Azure cloud, you get the expertise you need to build and deploy wherever you want, using the tools, applications, and frameworks of your choice.

### How Azure PaaS and IaaS can help your business

- ✓ **New capabilities and services.** Leverage the built in capabilities and services of the cloud, such as serverless computing, AI, data and analytics, auto-scaling, and much, much more.
- ✓ **Eliminate capital expenses and lower ongoing costs.** Eliminate the expense of setting up and managing an on-site datacenter or using third party hosting services.
- ✓ **Focus on your core business.** Free your management team to focus on your organization's core business strategy rather than on IT operations and infrastructure.
- ✓ **Faster development and time to market.** Cut the time it takes to develop new apps with pre-coded application components built into the platform, such as directory services and security features, and leverage Azure's DevOps capabilities.
- ✓ **Improved business continuity, DR, and security.** Leverage Azure's built-in security, backup, and disaster recovery services.

### Azure PaaS and IaaS Services

- Move your apps to the cloud and scale at the touch of a button
- Migrate your IT infrastructure for dramatic cost savings
- Leverage cloud features such as Analytics, AI, and Cognitive Services
- Implement security, backup, and DR solutions
