

MICROSOFT SECURITY

This one-day workshop will give you essential knowledge and hands-on experience of the Azure platform security services.

Our Security workshop is designed to:

1. Review your existing on-premises security needs.
2. Identify any gaps that you have already, vs what you'll get in the cloud Identify real threats to your cloud environment.
3. Work with you to understand your security goals and objectives.
4. Develop joint plans and next steps.
