

DEVOPS ASSESSMENT

DevOps is the union of people, processes and technology to enable continuous delivery of value to your end users. How do you stack up against your competition?

DevOps sits at the intersection of people, processes and technology and has the potential to accelerate delivery of your ideas and grow your business more quickly. DevOps enables innovation to be delivered to customers quickly and leverages automation to ensure your solutions work first time, every time, enabling companies to better compete in today's fast-paced market. But where should your organization begin with this transformation?

New Signature's DevOps Assessment is the beginning of your DevOps journey and lays the foundation for changes in tools and processes that will enable teams to collaborate and deliver value faster. We help you learn more about DevOps and gauge your organization's maturity within a DevOps model. Through workshops and road-mapping sessions, we can deliver recommendations to transform your business through the power of DevOps.

How Will DevOps Benefit:

People?

Moving to a DevOps model means big changes to how people across your development and operations team interact with each other. These changes can be disruptive so it's vital you understand them and how best to align your teams for success.

Processes?

DevOps also has a dramatic impact on your existing change, release and deployment processes. Better understanding how to move from the ways you do things today to how you will do them tomorrow is vital for your initiative to succeed.

Technology?

Getting your people and processes in shape depends on providing the right toolchain to them. Legacy, on premises, toolsets are not going to give you the results you need. Leveraging cloud-native tools such as Azure DevOps and GitHub will turbocharge and allow your development and operations team to work seamlessly together.

Breakdown of Our 5-Day DevOps Assessment

Day 0: Pre-engagement	✓ Discovery questionnaire and identification of participants
Day 1: Kick-off & Value Workshop	✓ Overview of your applications and teams ✓ Half-day workshop on the value of DevOps
Day 2-3: Workshops & Interviews	✓ Review current processes for software development lifecycle ✓ Assess and document current DevOps maturity
Day 4: DevOps Roadmap	✓ Identify high-value opportunities for improvement ✓ Define implementation roadmap
Day 5: Review & Next Steps	✓ Present findings and review next steps

As an elite DevOps performer, your organization can experience:

Take your first step toward a DevOps Transformation.
