

## Microsoft Dynamics Software Licensing Asset Management

**Columbus is providing a licensing audit to give an accurate view of actuals vs current license counts. Whether a Microsoft audit is imminent or just a possibility in the future, you can save yourself some headaches by getting all of your ducks in a row when it comes to license tracking.**

### Prerequisites:

- Must be on prior version of Dynamics AX
- Dynamics AX 3.0
- Dynamics AX 4.0
- Dynamics AX 2009
- Dynamics AX 2012

The scope of the licensing audit project will include:

- Conduct licensing types review
- Conduct license count audit
- Conduct future state analysis of licensing needs
- Review user roles and security
- Discussion of concurrent vs new named user licensing
- Identify user roles required for potential upgrade project to D365F&O
- Determine appropriate license roles for employees

### Deliverables

- Assess and Plan you license migration to Microsoft D365FO On-prem or Cloud.
- Documentation of list of user roles and counts classified by license type.
- Documentation of future state D365FO license counts and types.
- Estimated monthly license cost for D365FO On-Prem or Cloud.
  - EA
  - Tiered Pricing program
- Support throughout the Migration Process by Columbus
- Discussion of concurrent vs new named user licensing structure
