

Data Platform Modernisation Launchpad

Ensure your environments
remain supported

Are you:

- Currently running on unsupported platforms?
- Need to understand options to stay supported?
- Looking for guidance on modernisation or migration?

Running mission and business critical applications on supported platforms is essential for the success of any organisation. Running legacy data platforms introduces unnecessary application, availability, security and performance risk.

Coeo's Data Platform Modernisation Launchpad uses a robust, repeatable framework to migrate customer data to modern, feature-rich, supported platforms. Coeo have significant experience in delivering cloud and on-premises solutions that meet all customers' requirements around availability, security and performance.

Scope and Focus

Our consulting team bring strategic expertise, planning and design skills, complementing an organisation's existing operational knowledge. The Data Platform Modernisation Launchpad starts by identifying key business goals and helps technical teams build the most appropriate solution to meet their needs.

Coeo's Approach

Coeo lead your team through a series of scoping, requirements and solution design workshops. They use their hands-on technical experience to provide a solution that supports both your business requirements and technical objectives through our robust, repeatable process:

1. **Discover** – Discovery of all the components, downstream and upstream applications and services that rely on the data workload in scope
2. **Analyse/Remediate** – Detailed analysis of each workload, and completion of mandatory remediation work
3. **Build/Deploy** – Automated deployment of data platform solution using tried and tested scripts.
4. **Test** – Testing of the workloads on the new platform to mitigate the risks associated with critical system migrations.
5. **Migrate** – Fully documented migration and rollback plan completed
6. **Optimise** – Performance is monitored and necessary remediation undertaken to ensure the performance of the new platform.
7. **Maintain** – Coeo can assist in the ongoing monitoring and maintenance of the new platform if required.

Why Coeo?

Coeo are trusted analytics and data management experts, delivering technology strategy and support for businesses who need to get the most from their data.

We architect, optimise and migrate mission-critical transaction processing systems and deploy business intelligence solutions that win business confidence and deliver insight.
